SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indicatio contraire) les colonnes laissées en blanc dans le cas des employés et de ouvriers indiqués séparément, signifient que les données relatives au ouvriers pour lesquels les heures sont enregistrées ne sont pa disponibles.

COMMENTARY

First Estimates(1) – January 1976

Seasonally-adjusted, the first estimate of the Canada industrial nposite(2) index of employment (1961 = 100) showed a 0.3% rease from December to January. Gains in forestry, manufacturing, nsportation, communication and other utilities, trade and service et losses in the remaining industry divisions.

Unadjusted for seasonal variations, average weekly earnings e 2.5% at the Canada industrial composite level in January (on a sonally-adjusted basis, this represented a 0.3% rise). Increases in estry, mining, manufacturing, construction, trade and service more n offset losses in the other two industry divisions.

Preliminary Data(1) – December 1975

ployment (seasonally-adjusted)

Preliminary data for December 1975 showed a 2.1% rise in the nada industrial composite employment index. Employment in nsportation, communication and other utilities jumped 8.7% reflec- the resolution of the industrial dispute in the post office. Increases mployment were also recorded in both the building and engineer- components of construction; there were widespread increases in non-durable goods (particularly food and beverages) and durable ds components of manufacturing. Service, trade, mining, and nce insurance and real estate also registered employment gains. estry employment showed a decrease of 5.3%.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 1.6% at the nada industrial composite level; all regions and all industry sions, except forestry, and transportation, communications and r utilities recorded gains.

Unadjusted for seasonal variations, average weekly earnings lined 0.1% to $211.21 reflecting decreases in all regions and all stry divisions except trade, service and finance insurance and real te. Decreases in construction, manufacturing and forestry gener- reflected the decrease of hours paid associated with the December day season. The drop in earnings for transportation, communica- and other utilities mainly reflected the increased employment in post office, where earnings are lower than the industry division rage.

Average weekly hours of houly-rated wage-earners decreased hours to 37.7 in manufacturing, 1.1 hours to 39.5 in mining, and hours to 35.6 in construction. Average hourly earnings increased nts in manufacturing to $4.78, and 3 cents in mining to $6.98; and re was a 26 cent drop in construction to $7.93.

See note on Statistical Presentation under Concepts and Methods at the back of this publication.

Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty(20) or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – Janvier 1976

La première estimation désaisonnalisée de l'indice composite(2) de l'emploi dans les activités économiques du Canada (1961 = 100) indique une augmentation de décembre à janvier. Des gains dans le forestage, les manufactures, les transports, les communications et autres services publics, et dans le commerce et les services ont effacé les pertes observées dans les autres divisions de l'activité économique.

Les gains hebdomadaires moyens non désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada, ont augmenté de 2.5% en janvier (désaisonnalisés, ces chiffres représentent une hausse de 0.3%). Des augmentations dans le forestage, les mines, les manufactures, la construction, le commerce et les services ont plus que compensé les diminutions notées dans les deux autres divisions de l'activité économique.

Données provisoires(1) – Décembre 1975

Emploi (chiffres désaisonnalisés)

Les données provisoires pour décembre 1975 indiquent une progression de 2.1% de l'indice composite de l'emploi dans les activités économiques du Canada. L'emploi dans les transports, les communications et autres services a grimpé de 8.7%, ce qui traduit le règlement du comflit de travail dans les postes. On a également observé une augmentation de l'emploi dans les deux composantes de la construction, soit le bâtiment et le génie civil; il y a eu des progressions généralisées dans les composantes des biens non durables (particulièrement les aliments et boissons) et des biens durables des manufactures. Quant aux branches des services, du commerce, des mines et des finances, assurances et immeuble, elles ont également enregistré des gains de l'emploi. Par contre, l'emploi dans le forestage a accusé une baisse de 5.3%.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada ont progressé de 1.6%; toutes les régions et toutes les divisions de l'activité économique, à l'exception du forestage et des transports, communications et autres services publics, ont connu des hausses.

Les gains hebdomadaires moyens, non désaisonnalisés, ont fléchi de 0.1% pour s'établir à $211.21, en raison des baisses observées dans toutes les régions et dans toutes les divisions d'activité sauf le commerce, les services et les finances, assurances et immeuble. Les baisses notées dans la construction, les manufactures et le forestage étaient généralement attribuables à la diminution du nombre d'heures de travail rémunéré pendant la période des Fêtes. Quant à la régression des gains dans les transports, communications et autres services publics, elle provenait, en grande partie, de l'augmentation de l'emploi dans les postes, où les gains sont inférieurs à la moyenne pour l'ensemble de la division.

Le nombre moyen d'heures hebdomadaires travaillées par des ouvriers payés à l'heure a diminué pour se fixer à 37.7 dans les manufactures (-1.3 heure) à 39.5 dans les mines (-1.1 heure) et à 35.6 dans la construction (-4.2 heures). Par ailleurs, les gains hebdomadaires moyens ont monté de 8 cents dans les manufactures pour atteindre $4.78 et de 3 cents dans les mines pour se fixer à $6.98; on a toutefois observé une baisse de 26 cents dans la construction, ce qui s'est traduit par des gains hebdomadaires moyens de $7.93.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'indice composite comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et les services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Les données sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt(20) employés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières periodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiee, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice etant plus pres de la periode au cours de laquelle les salaires sont dépenses. 2. Voir le detail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses elements dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les donnees de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tires de la presente enquête, on a quand meme fait un calcul special a la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-region.

TABLE 10. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

Voir le n^{O} *72-002 catalogue, septembre 1974.*

Toutes les autres séries sont publiées dans les bulletins mensuels n^{O} *72-002* au catalogue pour les années *1971, 1972* et *1973.*

(1) Les numéros des publications susmentionnées renferment les dernièr données disponibles pour toute série donnée. Les données relative ces séries figurant dans d'autres numéros de ces publications peuv avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects ation on employment, earnings and hours which are tabulated ent the data in this report. Data which, prior to March 1971, ublished separately in "Employment and Average Weekly and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this The following notes explain the concepts and methods used in vey.

ing Unit

The reporting unit is usually the establishment, that is, the t industrial unit which is a separate operating entity capable of g all elements of basic industrial statistics including informa- inputs and outputs needed to calculate "value added" or mark-up' or "gross profit" as well as data on employment and s. For purposes of detailed geographic statistics, the Section equests that the reporting unit be a sub-establishment unit although not capable of reporting all basic statistics, can report ment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, ies having 20 or more employees in any month of the year. r, all the establishments of a multi-establishment company are d if the company had 20 or more employees in total in any of the year even though any single establishment may have had ew employees.

ce Period

Conceptually, the figures refer to the last seven days in the d months. In practice, few establishments keep payroll records g precisely this period and establishments are therefore ed to report for their last pay period or pay periods in each

When the reported pay period is longer than one week, the data are reduced to one week's proportion of the totals. The tors of the fractions used in calculating these weekly equiv- re 5, 6 or 7, depending on the number of working days per which the establishment operated in the pay period. The nators of the fractions are the number of working days in the t pay periods. For employees paid at annual or monthly rates, arnings are not affected by the number of working days in the fixed proportions are used to reduce the earnings to a weekly ithout regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an nment that reports a pay period that is different from the last ays of the month, an adjustment is made to the data, if the layoff or dispute affects the two periods differently, so that the curately reflects the actual situation during the reference

e

All industries are covered by the survey, with the exceptions of ure, fishing and trapping, education and related services, nd welfare services, religious organizations, private house- d public administration and defence. Because of the limitation urvey to larger firms, there is somewhat uneven coverage of ployment by industry as well as by province and urban area. centage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employ*ment and Average Weekly Wages and Salaries*" (n° 72-002 au catalogue) et dans "Man-Hours *and Hourly Earnings*" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des gran établissements aux petits établissements. Cette proportion varie consider blement d'une branche à l'autre. Le tableau suivant indique le chiff annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiff estimatif de l'emploi total, ce dernier étant la somme des résultats l'enquête sur l'emploi et la rémunération et des résultats d'une enquête p échantillon auprès des petites entreprises ainsi que d'autres enquêt supplémentaires. Des estimations du nombre total d'employés sont p bliées sous le titre "Estimations du nombre d'employés par province et p industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sampl survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête su l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquête supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement le services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, religiou organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ce pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociale les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'empl dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les servic non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimate employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciau de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts p l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la constructi ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province, à un co (selon la définition établie par le recensement de la population) et, s'il lieu, à une région urbaine. Les données de Terre-Neuve, de l' du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick s agrégées dans certains tableaux présentant des statistiques pour la rég de l'Atlantique. De la même manière, les données du Manitoba, d Saskatchewan et de l'Alberta sont additionnées pour former le total d région des Prairies. On a retenu la définition de "région métropolitai établie pour le recensement de la population dans le cas des dix-r régions urbaines. Les définitions employées pour les autres régions urba sont fondées sur le concept du marché du travail; les régions englob ordinairement le territoire avoisinant avec le centre urbain. On peut obt

s and Labour Income Section. The reporting units not located bulated urban area are included in county, provincial and l totals.

ial Classification

All establishments are assigned to an industrial class on the f their principal activity. If an establishment is engaged in a r of different industrial activities, its principal activity is ined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different es. When an establishment has very mixed activities, it is not rily shifted from industry to industry each time its principal changes.

Statistics from the survey are based on the 1960 Standard ial Classification. A description of the various industries and of industries may be found in the "Standard Industrial cation Manual', Catalogue 12-501 (1960). The "S.I.C. code" s in the main tables refer to this manual. The tables contain a oupings not found in the Standard Industrial Classification. nclude:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

ment

Employment data represent all employees on the payrolls of ng units in the reference period. The employee concept excludes g owners or partners in unincorporated businesses, non-g directors, the self-employed, unpaid family workers, persons non-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n^{O} 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404)et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries'. These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles, pensionnés, les travailleurs à domicile et les personnes fournissant services à forfait ou sous contrat. Sont donc considérés comme salariés les ouvriers et tous les employés qui sont rémunérés pour leurs service qui sont en congé payé pendant la période de référence, à l'exception occasionnels ayant travaillé moins de sept heures pendant la période paye. Les *salariés réguliers à temps partiel* sont comptés parmi les sala quel que soit le nombre d'heures qu'ils travaillent pendant la période paye.

Par exemple, une personne travaillant une partie de la période référence et en chômage ou en grève le reste de la période, est com comme occupée. Les salariés qui ne sont pas rémunérés pour tout période de référence à cause d'une grève ou des conséquences d'une gr ou les personnes en congé sans paye ne figurent pas parmi les perso occupées.

Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le m de rémunération. Les ouvriers sont les personnes travaillant effectiver à la production et à des opérations assimilées, en particulier le perso d'entretien, d'entrepôt et de livraison, le personnel de sécurité. chauffeurs-livreurs, les vendeurs itinérants, les commis des magasin détail, les serveuses et les contremaîtres remplissant des fonctions ar gues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peu être rémunérés sur une base mensuelle fixe ou suivant le nombre d'he travaillées. L'enquête couvre tous les ouvriers quel que soit leur mod rémunération et les gains hebdomadaires moyens sont calculés pour Toutefois, les heures hebdomadaires moyennes et les rémunérat horaires moyennes sont calculées uniquement d'après les données rela aux ouvriers dont on peut connaître le nombre d'heures de travail.

Employés

Les employés comprennent les directeurs, les administrateurs surveillants, les cadres techniques et spécialisés, les agents à la commis les voyageurs de commerce relevant directement de l'administration, que les employés de bureau, les commis et les travailleurs assimilés bureau et à l'usine. Les membres des conseils d'administration d'entr ses constituées en corporation qui travaillent dans l'entreprise également compris dans cette catégorie.

Rémunération

Les rémunérations des ouvriers et des employés représenter gains bruts de la semaine, avant toutes déductions d'impôt, de cotisa d'assurance-chômage, etc. La rémunération brute comprend les salair rémunération au taux ordinaire, la rémunération du travail aux pièces commissions régulières, les primes au rendement, les primes de vie chè autres gratifications versées régulièrement, les gains pour travail su mentaire et les paiements versés aux personnes en congé payé penda semaine de l'enquête. Le concept de rémunération ne comprend pa frais supplémentaires de main-d'oeuvre tels que les cotisations de ployeur à la caisse d'assurance-chômage, aux régimes d'assurance-mal à la caisse d'indemnisation des accidents de travail et à d'autres régim prévoyance; il ne comprend pas non plus le coût du matériel, la vale la pension, les paiements en nature, les frais de déplacement, les indem de retraite, les gratifications versées à intervalles irréguliers et peu fréq ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains ouvriers et des employés. Les publications antérieures à mars renfermaient des données réunies sous le titre "Average Weekly W and Salaries". Ces données sont comparables aux "rémunérations he madaires moyennes" des salariés pris en compte ici. Ce système p

present publication. The system now provides separate earnings ta for all wage-earners and salaried employees whereas formerly dy "Average Weekly Wages" for hourly-rated wage-earners was ailable.

dex Numbers

Index numbers are calculated by dividing the current month's ployment (or payroll) by the monthly-average of the total base ar employment (or payroll). The current employment consists of all ployment reported by establishments that meet our size criteria in current period. Base year employment consists of the employment establishments that had 20 or more employees in any month of 61. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employnt indexes those regularly recurring fluctuations known as "seaal variations". The adjusted index numbers thus approximate the nd, cycle, and irregular components of the time series. The X-11 riant of the U.S. Census Method II is used to calculate the sonally-adjusted index numbers; additional seasonally-adjusted ies may be found in "Employment, earnings and hours, seasonly- adjusted series January 1961 - December 1971" (Catalogue 7206).

erages

The average weekly hours figure is obtained by dividing total ekly man-hours by the number of wage-earners who worked those rs. Average hourly earnings are obtained by dividing total weekly ges of hourly-rated wage-earners by their total weekly hours. Both these averages apply only to the subset of wage-earners for whom rly details are reported. It should be noted that total hours include rtime hours actually worked and that the wage-earner total ludes part-time wage-earners and casuals working more than seven rs during one week. Annual statistics are calculated from the regate of the monthly data, with the exception of those shown as liminary(p); the latter are based on monthly averages.

tistical Presentation

Each month, statistics for three months are prepared by the nthly Employment, Payrolls and Labour Income Section. Data for first, most current month, are entitled first estimates. They are ed on a limited number of returns (usually about 50%) and only hly aggregated figures are released in the Statistics Canada Daily the First Estimates table of this publication. Simultaneously, ond estimates are prepared for the month immediately preceding most current data and third estimates for the month prior to that. h of these latter estimates are of higher quality than that of the first ause of the higher rate of returns (typically, 65% and 75%, ectively). Consequently full details for both months are shown hin this publication.

After completion of the third estimate, further revisions to the a are made to incorporate late returns and corrected information eived from our respondents or to rectify mechanical errors. Larger rections are calculated immediately and appear in the historical special tables and in column for the previous year in tables 2, 3 4 of this publication. The smaller corrections are completed in the ual tabulations when all returns are retabulated to produce revised res and annual averages; these data are contained in catalogue 7201 and 72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n^{O} 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indic contraire) les colonnes laissées en blanc dans le cas des employés e ouvriers indiqués séparément, signifient que les données relative ouvriers pour lesquels les heures sont enregistrées ne sont disponibles.

COMMENTARY

First Estimates(1) – February 1976

Seasonally-adjusted, the first estimates of the Canada industrial composite(2) index of employment (1961 = 100) showed a 0.2% increase from January to February. Gains in forestry, manufacturing (both durables and non-durables), and finance, insurance and real estate offset losses in the remaining industry divisions.

Unadjusted for seasonal variations, average weekly earnings in the national industrial composite rose 1.3% in February; on a seasonally-adjusted basis, this represents an increase of 1.2%. All industry divisions posted gains with the exception of service.

Preliminary Data(1) – January 1976

Employment(seasonally-adjusted)

Preliminary data for January 1976 showed a slight rise in the Canada industrial composite employment index from December. Increased employment in trade was particularly concentrated in the department and variety stores; in transportation, communication and other utilities the increase was mainly in the transportation component. Non-durable manufacturing posted gains, as a result of the settlement of industrial disputes in paper and allied industries; other increases were recorded in transportation equipment and wood products. Gains were also recorded in forestry, finance, insurance and real estate and mining, while service and construction declined.

Earnings and Hours

Seasonally-adjusted, average weekly earnings rose 0.7% at the Canada industrial composite level. Gains occurred in all regions except Ontario, and in all industry divisions except manufacturing.

Unadjusted for seasonal variations, average weekly earnings rose 2.8% to $216.40 at the national industrial composite level in January. Average weekly hours of hourly-rated wage-earners increased 3.1 hours to 38.2 in construction, 0.9 hours to 38.6 in manufacturing and 0.3 hours to 40.4 in mining.

(1) See note on Statistical Presentation under Concept and Methods at the back of this publication.

(2) Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty(20) or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – Février 1976

Après désaisonnalisation, les premières estimations de l'indice composite de l'emploi dans les activités économiques(2) du Canada (1961 = 100) affichent une augmentation de 0.2% entre janvier et février. Des gains dans le forestage, les industries manufacturières (biens durables et non durables) et les finances, assurances et immeuble ont compensé les pertes observées dans les autres divisions de l'activité.

Sans désaisonnalisation, les gains hebdomadaires moyens pour l'ensemble des activités économiques ont augmenté de 1.3% en février; après désaisonnalisation, cela représente une progression de 1.2%. Toutes les divisions de l'activité ont affiché des gains à l'exception de celle des services.

Données provisoires(1) – Janvier 1976

Emploi(chiffres désaisonnalisés)

Les données provisoires pour janvier 1976 indiquent une légère augmentation de l'indice composite de l'emploi dans les activités économiques du Canada par rapport à décembre 1975. Les gains dans le commerce étaient surtout concentrés dans les magasins à rayons et les bazars; par ailleurs, dans les transports, communications et autres services d'utilité publique, l'augmentation a été enregistrée principalement dans la composante des transports. On a observé une hausse dans les biens non durables (industries manufacturières) par suite du règlement des conflits du travail dans l'industrie du papier et des produits connexes; on a relevé d'autres augmentations dans le matériel de transport et les produits du bois. Enfin, l'emploi a progressé dans le forestage et les finances, assurances et immeuble alors qu'il a régressé dans les services et la construction.

Gains et heures de travail

Après désaisonnalisation, les gains hebdomadaires moyens ont progressé de 0.7 % dans l'ensemble des activités économiques du Canada. On a observé des augmentations dans toutes les régions à l'exception de l'Ontario, et dans toutes les divisions de l'activité sauf les industries manufacturières.

Sans désaisonnalisation, les gains hebdomadaires moyens ont atteint $216.40 en janvier, ce qui représente une hausse de 2.8 % pour l'ensemble des activités économiques du Canada. Les heures hebdomadaires moyennes des ouvriers payés à l'heure ont connu une hausse de 3.1 heures dans la construction (38.2), de 0.9 heure dans les industries manufacturières (38.6) et de 0.3 heure dans les mines (40.4).

(1) Voir la note sur la "Présentation statistique" sous la rubrique "Concepts et méthodes" à la fin de la présente publication.

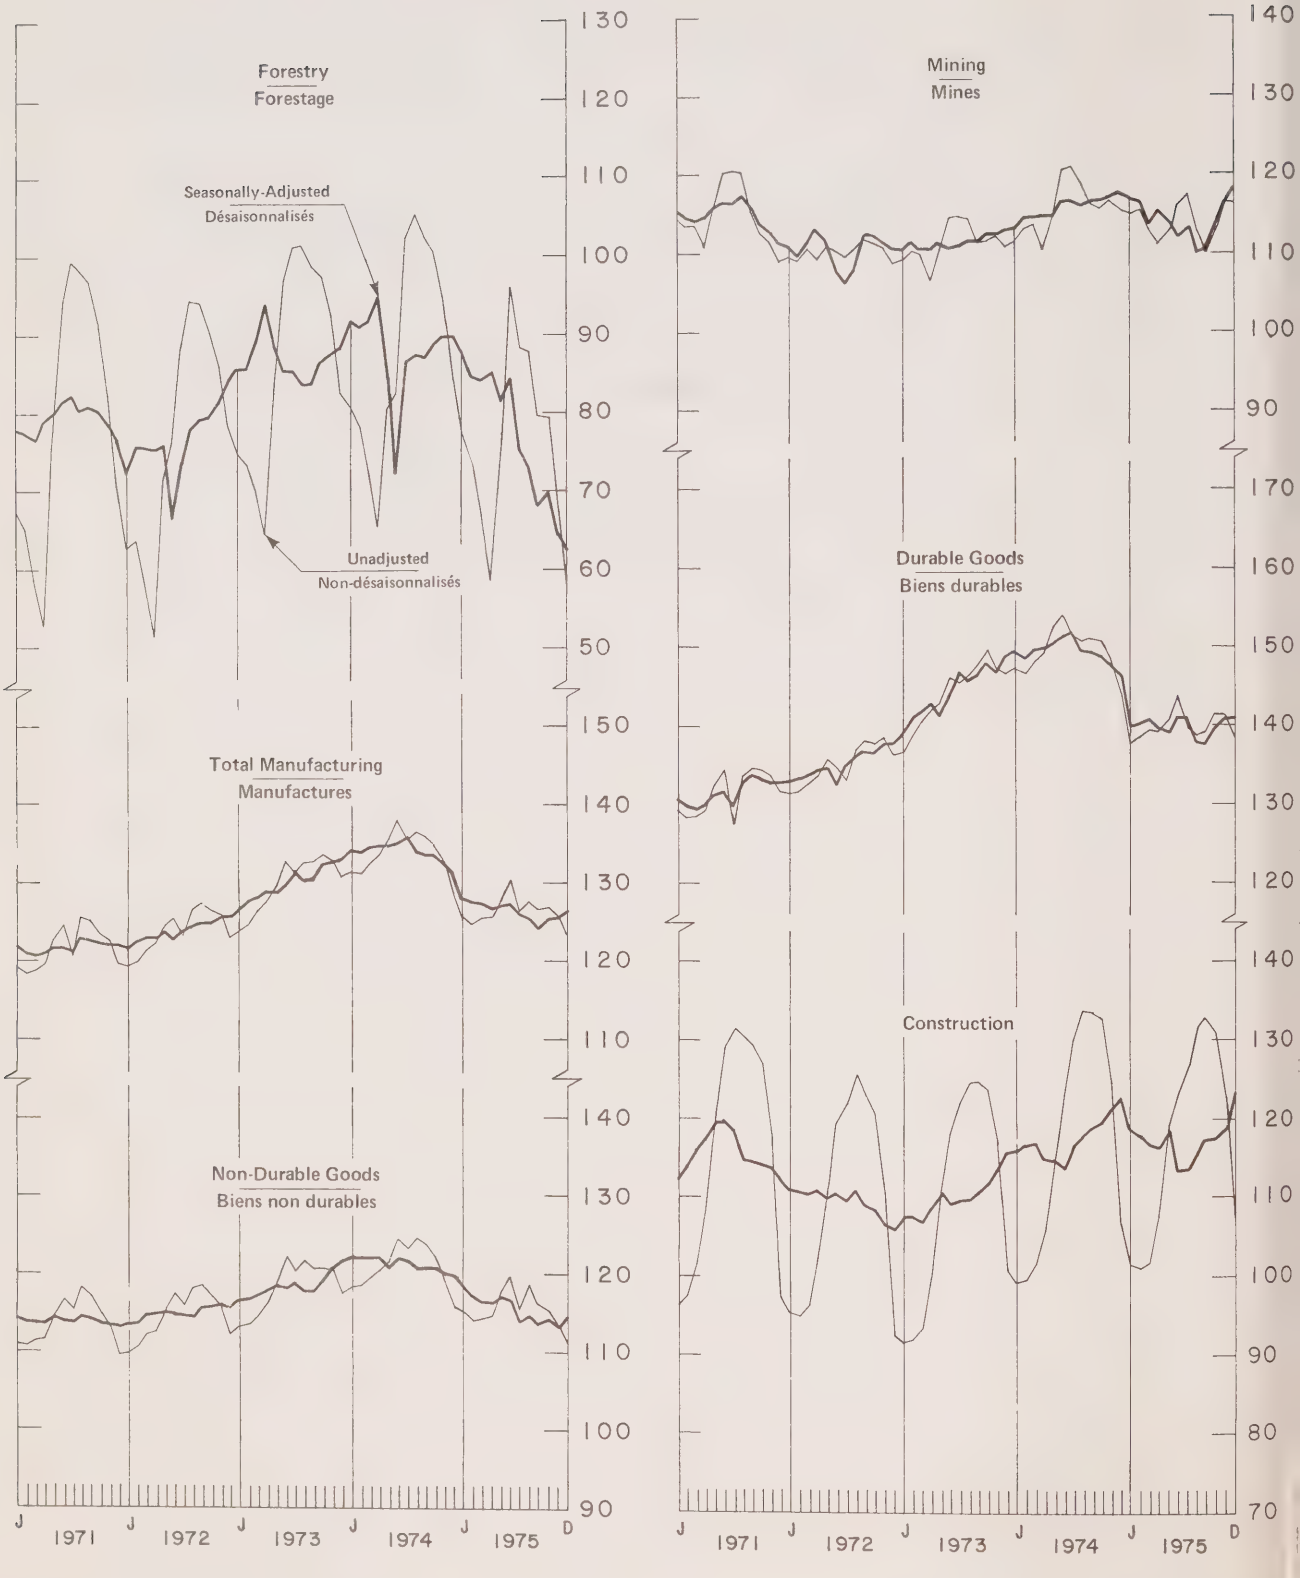

(2) L'ensemble des activités économiques comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, la santé et les oeuvres sociales, les organismes religieux, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations des employeurs ayant vingt(20) salariés ou plus à leur service au cours d'un mois quelconque de l'année.

First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indicè des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

TABLE 8. Index Numbers (1961=100) of Average Hourly Earnings in Selected Industries, for Canada 1961-1975

TABLEAU 8. Indices (1961=100) de la rémunération horaire moyenne, certaines industries, Canada, 1961-1975

Toutes les autres séries sont publiées dans les bulletins mensu n^{O} *72-002* au catalogue pour les années *1971, 1972* et *1973.*

(1) Les numéros des publications susmentionnées renferment les der données disponibles pour toute série donnée. Les données relat ces séries figurant dans d'autres numéros de ces publications pe avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour
me Section of the Labour Division, through a mail survey, collects
rmation on employment, earnings and hours which are tabulated
resent the data in this report. Data which, prior to March 1971,
published separately in "Employment and Average Weekly
es and Salaries" (Catalogue 72-002) and in "Man-Hours and
rly Earnings" (Catalogue 72-003) have been combined in this
rt. The following notes explain the concepts and methods used in
urvey.

orting Unit

The reporting unit is usually the establishment, that is, the
lest industrial unit which is a separate operating entity capable of
rting all elements of basic industrial statistics including informa-
on inputs and outputs needed to calculate "value added" or
ss mark-up' or "gross profit" as well as data on employment and
olls. For purposes of detailed geographic statistics, the Section
requests that the reporting unit be a sub-establishment unit
h, although not capable of reporting all basic statistics, can report
oyment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is,
panies having 20 or more employees in any month of the year.
ever, all the establishments of a multi-establishment company are
ded if the company had 20 or more employees in total in any
h of the year even though any single establishment may have had
a few employees.

rence Period

Conceptually, the figures refer to the last seven days in the
fied months. In practice, few establishments keep payroll records
ing precisely this period and establishments are therefore
itted to report for their last pay period or pay periods in each
h.

When the reported pay period is longer than one week, the
ll data are reduced to one week's proportion of the totals. The
rators of the fractions used in calculating these weekly equiv-
are 5, 6 or 7, depending on the number of working days per
in which the establishment operated in the pay period. The
minators of the fractions are the number of working days in the
ent pay periods. For employees paid at annual or monthly rates,
e earnings are not affected by the number of working days in the
h, fixed proportions are used to reduce the earnings to a weekly
without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an
lishment that reports a pay period that is different from the last
days of the month, an adjustment is made to the data, if the
ay, layoff or dispute affects the two periods differently, so that the
accurately reflects the actual situation during the reference
d.

rage

All industries are covered by the survey, with the exceptions of
lture, fishing and trapping, education and related services,
and welfare services, religious organizations, private house-
and public administration and defence. Because of the limitation
survey to larger firms, there is somewhat uneven coverage of
mployment by industry as well as by province and urban area.
ercentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employ*ment and Average Weekly Wages and Salaries"* (n^{O} 72-002 au catalogue) et dans "Man-Hours *and Hourly Earnings"* (n^{O} 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du estimatif de l'emploi total, ce dernier étant la somme des résult l'enquête sur l'emploi et la rémunération et des résultats d'une enqué échantillon auprès des petites entreprises ainsi que d'autres enq supplémentaires. Des estimations du nombre total d'employés so bliées sous le titre "Estimations du nombre d'employés par province industrie" (nº 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sar survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enqu supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulemen services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, relig organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres soci les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'em dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les serv non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estim employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerc de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construc ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province, à un c (selon la définition établie par le recensement de la population) et, s lieu, à une région urbaine. Les données de Terre-Neuve, de du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick agrégées dans certains tableaux présentant des statistiques pour la r de l'Atlantique. De la même manière, les données du Manitoba, Saskatchewan et de l'Alberta sont additionnées pour former le total région des Prairies. On a retenu la définition de "région métropolit établie pour le recensement de la population dans le cas des dix régions urbaines. Les définitions employées pour les autres régions urb sont fondées sur le concept du marché du travail; les régions engl ordinairement le territoire avoisinant avec le centre urbain. On peut ol

olls and Labour Income Section. The reporting units not located tabulated urban area are included in county, provincial and nal totals.

trial Classification

All establishments are assigned to an industrial class on the of their principal activity. If an establishment is engaged in a er of different industrial activities, its principal activity is nined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different ies. When an establishment has very mixed activities, it is not arily shifted from industry to industry each time its principal y changes.

Statistics from the survey are based on the 1960 Standard rial Classification. A description of the various industries and s of industries may be found in the "Standard Industrial fication Manual', Catalogue 12-501 (1960). The "S.I.C. code" ns in the main tables refer to this manual. The tables contain a roupings not found in the Standard Industrial Classification. include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

ment

Employment data represent all employees on the payrolls of g units in the reference period. The employee concept excludes g owners or partners in unincorporated businesses, non-, directors, the self-employed, unpaid family workers, persons on-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n° 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404)et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries'. These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévole pensionnés, les travailleurs à domicile et les personnes fournissan services à forfait ou sous contrat. Sont donc considérés comme salariés les ouvriers et tous les employés qui sont rémunérés pour leurs servic qui sont en congé payé pendant la période de référence, à l'exceptio occasionnels ayant travaillé moins de sept heures pendant la périoc paye. Les *salariés réguliers à temps partiel* sont comptés parmi les sa quel que soit le nombre d'heures qu'ils travaillent pendant la périoc paye.

Par exemple, une personne travaillant une partie de la périoc référence et en chômage ou en grève le reste de la période, est con comme occupée. Les salariés qui ne sont pas rémunérés pour tou période de référence à cause d'une grève ou des conséquences d'une g ou les personnes en congé sans paye ne figurent pas parmi les perso occupées.

Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le r de rémunération. Les ouvriers sont les personnes travaillant effective à la production et à des opérations assimilées, en particulier le perso d'entretien, d'entrepôt et de livraison, le personnel de sécurité chauffeurs-livreurs, les vendeurs itinérants, les commis des magasin détail, les serveuses et les contremaîtres remplissant des fonctions a gues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peu être rémunérés sur une base mensuelle fixe ou suivant le nombre d'h travaillées. L'enquête couvre tous les ouvriers quel que soit leur moc rémunération et les gains hebdomadaires moyens sont calculés pour Toutefois, les heures hebdomadaires moyennes et les rémunéra horaires moyennes sont calculées uniquement d'après les données rela aux ouvriers dont on peut connaître le nombre d'heures de travail.

Employés

Les employés comprennent les directeurs, les administrateur surveillants, les cadres techniques et spécialisés, les agents à la commi les voyageurs de commerce relevant directement de l'administration, que les employés de bureau, les commis et les travailleurs assimilé bureau et à l'usine. Les membres des conseils d'administration d'ent ses constituées en corporation qui travaillent dans l'entreprise également compris dans cette catégorie.

Rémunération

Les rémunérations des ouvriers et des employés représente gains bruts de la semaine, avant toutes déductions d'impôt, de cotisa d'assurance-chômage, etc. La rémunération brute comprend les salair rémunération au taux ordinaire, la rémunération du travail aux pièces commissions régulières, les primes au rendement, les primes de vie ch autres gratifications versées régulièrement, les gains pour travail su mentaire et les paiements versés aux personnes en congé payé pend semaine de l'enquête. Le concept de rémunération ne comprend p frais supplémentaires de main-d'oeuvre tels que les cotisations de ployeur à la caisse d'assurance-chômage, aux régimes d'assurance-ma à la caisse d'indemnisation des accidents de travail et à d'autres régim prévoyance; il ne comprend pas non plus le coût du matériel, la vale la pension, les paiements en nature, les frais de déplacement, les inden de retraite, les gratifications versées à intervalles irréguliers et peu fréq ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gain ouvriers et des employés. Les publications antérieures à mars renfermaient des données réunies sous le titre "Average Weekly V and Salaries". Ces données sont comparables aux "rémunérations h madaires moyennes" des salariés pris en compte ici. Ce système p

esent publication. The system now provides separate earnings or all wage-earners and salaried employees whereas formerly 'Average Weekly Wages" for hourly-rated wage-earners was ble.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

Numbers

Index numbers are calculated by dividing the current month's yment (or payroll) by the monthly-average of the total base nployment (or payroll). The current employment consists of all yment reported by establishments that meet our size criteria in rent period. Base year employment consists of the employment blishments that had 20 or more employees in any month of The payroll index is calculated in a similar fashion.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

Seasonally-adjusted index numbers remove from the employ-ndexes those regularly recurring fluctuations known as "sea-ariations'. The adjusted index numbers thus approximate the cycle, and irregular components of the time series. The X-11 of the U.S. Census Method II is used to calculate the ally-adjusted index numbers; additional seasonally-adjusted nay be found in "Employment, earnings and hours, season-adjusted series January 1961 - December 1971" (Catalogue).

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n^{O} 72-206 au catalogue).

es

Moyennes

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those Average hourly earnings are obtained by dividing total weekly of hourly-rated wage-earners by their total weekly hours. Both averages apply only to the subset of wage-earners for whom letails are reported. It should be noted that total hours include e hours actually worked and that the wage-earner total part-time wage-earners and casuals working more than seven uring one week. Annual statistics are calculated from the te of the monthly data, with the exception of those shown as ary(p); the latter are based on monthly averages.

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

al Presentation

ach month, statistics for three months are prepared by the Employment, Payrolls and Labour Income Section. Data for most current month, are entitled first estimates. They are n a limited number of returns (usually about 50%) and only ggregated figures are released in the Statistics Canada Daily First Estimates table of this publication. Simultaneously, stimates are prepared for the month immediately preceding current data and third estimates for the month prior to that. hese latter estimates are of higher quality than that of the first of the higher rate of returns (typically, 65% and 75%, ely). Consequently full details for both months are shown is publication.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

fter completion of the third estimate, further revisions to the made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger ns are calculated immediately and appear in the historical ial tables and in column for the previous year in tables 2, 3 this publication. The smaller corrections are completed in the bulations when all returns are retabulated to produce revised nd annual averages; these data are contained in catalogue nd 72-202.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indi contraire) les colonnes laissées en blanc dans le cas des employés ouvriers indiqués séparément, signifient que les données relativ ouvriers pour lesquels les heures sont enregistrées ne son disponibles.

COMMENTARY

First Estimates(1) – March 1976

Seasonally-adjusted, the first estimates of the Canada indus- composite(2) index of employment (1961 = 100) showed a 0.4% from February to March. Gains were recorded in forestry, ufacturing, construction, finance, insurance and real estate, and ce; mining and transportation, communication and other utilities ed no change and trade declined.

Unadjusted for seasonal variation, average weekly earnings ased 1.0% at the Canada industrial composite level (seasonally- ted earnings also rose 1.0%). All industry divisions recorded with the exception of transportation, communication and other es.

Preliminary Data(1) – February 1976

oyment (Seasonally-adjusted)

Preliminary data for February 1976 showed a 0.3% increase in anada industrial composite employment index. Employment in facturing increased by 1.3% mainly reflecting the final resolution lustrial disputes in paper and allied industries. These gains were ularly strong in the central and eastern parts of the country. try, trade, motor vehicles, miscellaneous manufacturing, textile cts and food and beverages also posted gains, Employment es were recorded in construction, transportation, communica- nd other utilities, service, mining and finance, insurance and real .

ngs and Hours

Seasonally-adjusted, average weekly earnings increased 1.1% national industrial composite level. Increases were recorded in ions and in all industry divisions with the exceptions of forestry rvice.

Unadjusted for seasonal variations, average weekly earnings .0% to $219.36 at the Canada industrial composite level. ge hourly earnings advanced in mining and construction by six and in manufacturing by seven cents. Average weekly hours ed in construction and manufacturing and showed a slight se in mining.

e note on Statistical Presentation under Concepts and Methods the back of this publication.
lustrial Composite is the sum of all industries with the exception agriculture, fishing and trapping, education and related rvices, health and welfare services, religious organizations, ivate households and public aadministration and defence. All atistics are based on returns received from employers having enty (20) or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – Mars 1976

Les premières estimations désaisonnalisées de l'indice composite(2) de l'emploi dans les activités économiques du Canada (1961 = 100) révèle une augmentation de 0.4% de février à mars. On a observé une progression dans le forestage, les manufactures, la construction, les finances, assurances et immeuble et les services; par ailleurs, les mines, les transports, communications et autres services publics sont demeurés stables et le commerce a accusé une baisse.

Les gains hebdomadaires moyens, non désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada ont progressé de 1.0% (les gains désaisonnalisés ont également augmenté de 1.0%). Toutes les divisions de l'activité économique ont enregistré des hausses à l'exception des transports, communications et autres services publics.

Données provisoires(1) – Février 1976

Emploi (chiffres désaisonnalisés)

Les données provisoires pour février 1976 font ressortir une progression de 0.3% de l'indice composite de l'emploi dans les activités économiques du Canada. L'emploi dans les manufactures a augmenté de 1.3%, ce qui traduit principalement le règlement définitif des conflits du travail dans l'industrie du papier et produits connexes. Les hausses se sont avérées particulièrement importantes dans les régions situées à l'est et au centre du pays. Le forestage, le commerce, les véhicules automobiles, les manufactures diverses, les textiles et les aliments et boissons ont également connu des hausses. Par contre, on a observé des baisses de l'emploi dans la construction, les transports, communications et autres services publics, les services, les mines, les finances, assurances et immeuble.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada se sont accrus de 1.1%. Toutes les régions et toutes les divisions de l'activité économique, à l'exception du forestage et des services, ont enregistré des hausses.

Les gains hebdomadaires moyens, non désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada ont progressé de 1.0% pour s'établir à $219.36. Les gains horaires moyens ont augmenté de six cents dans les mines et la construction et de sept cents dans les manufactures. Le nombre moyen d'heures hebdomadaires travaillées a augmenté dans la construction et les manufactures, mais il a légèrement diminué dans les mines.

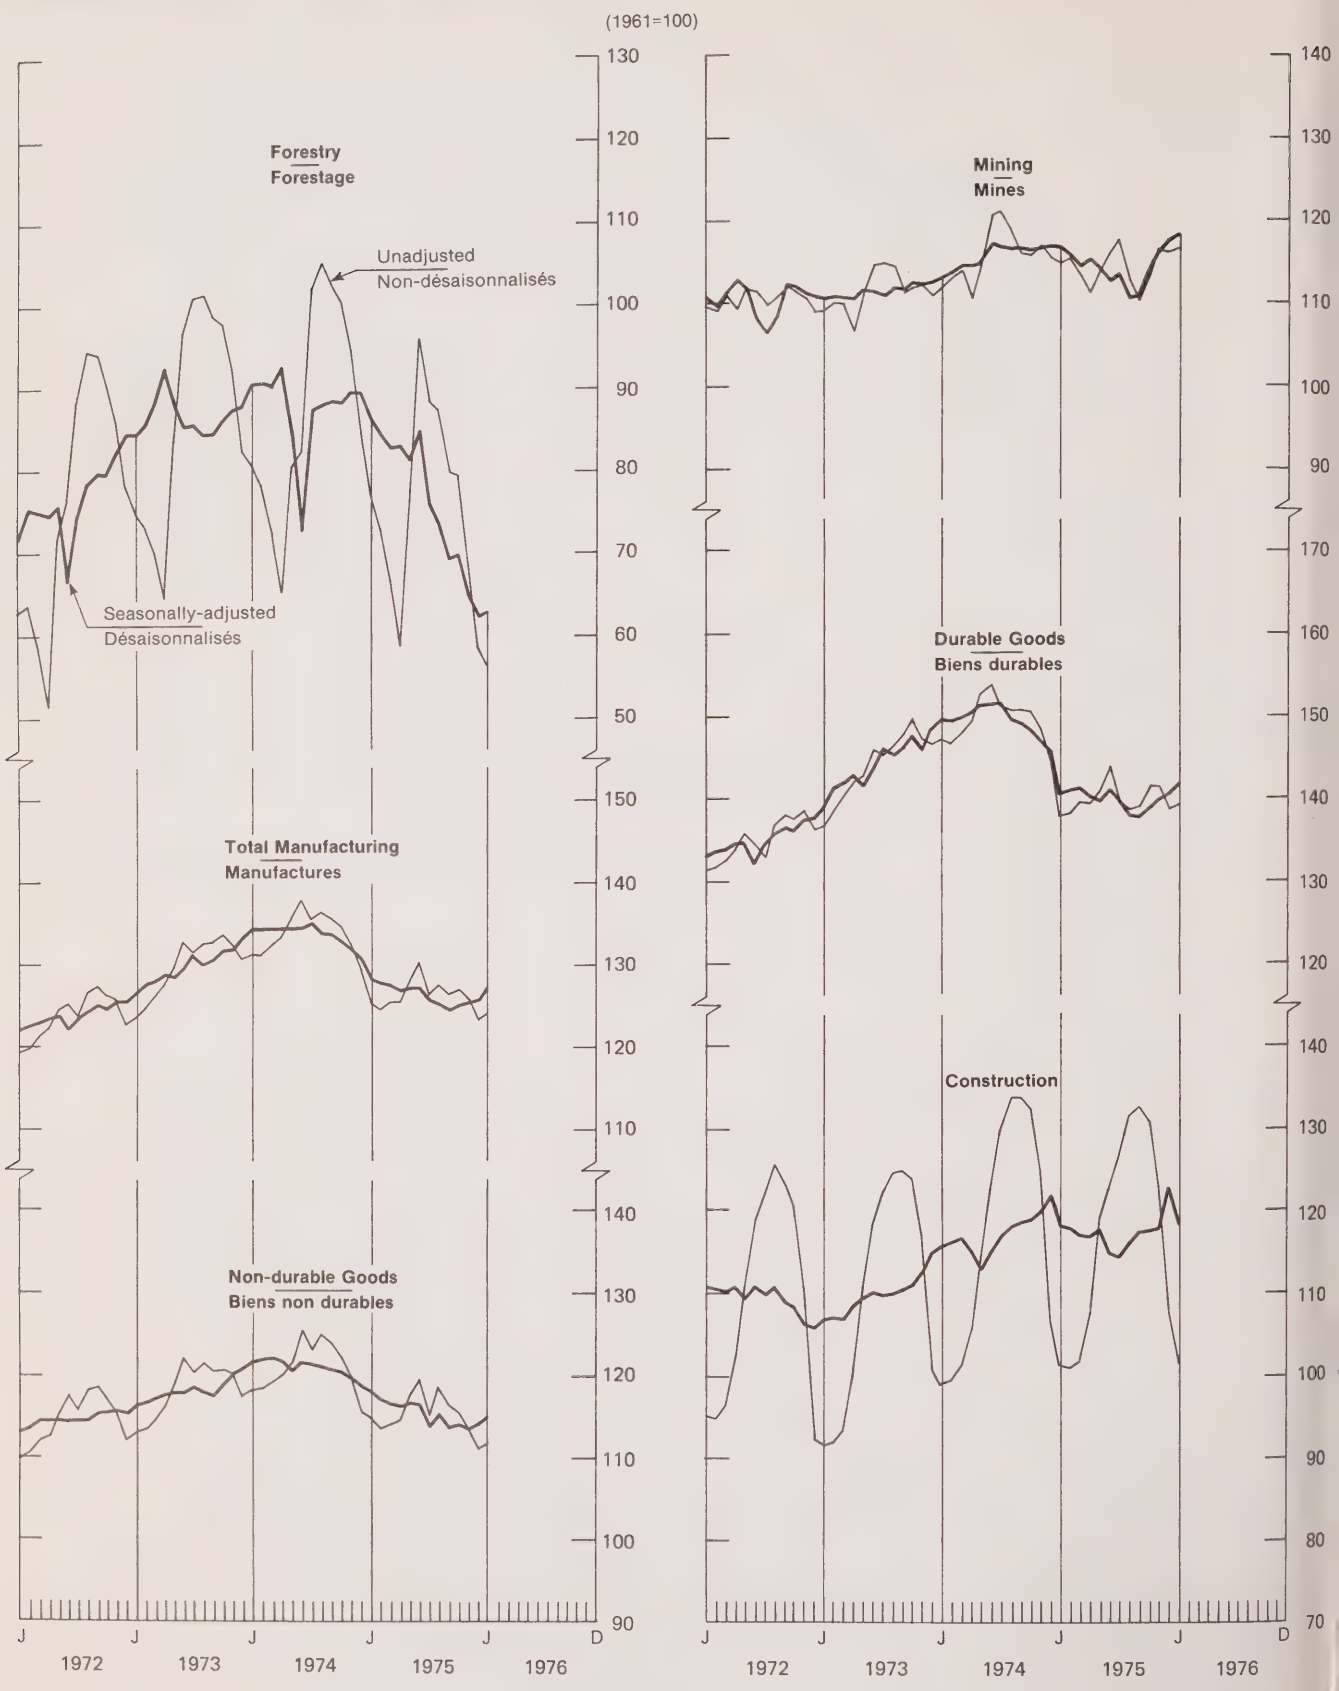

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'indice composite comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) salariés au cours d'un mois quelconque de l'année.

irst estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de éclarations.

1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

'ORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

Employment indexes (1961 = 100).

Average weekly earnings (formerly titled average weekly wages and salaries).

Average weekly hours and average hourly earnings of hourly-rated wage-earners.

Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).

Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

-1960

Monthly data were not published but are available on

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for s, bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu- and other utilities. Employment, Earnings and Hours, *Cata- -002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for s, bridges and streets; engineering; construction; highway ge maintenance; transportation; and transportation, commu- and other utilities. *Catalogue 72-002, February 1968.*

verage Weekly Earnings, 1961-1969 for:

Transportation; Highway and bridge maintenance.

Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

otia: Transportation, communication and other utilities; Transportation.

Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72- 002, November 1971.*

verage Weekly Earnings, 1968-1970, for Canada, Ontario nto, for scientific and professional equipment; miscellaneous uring industries; non-durable goods; manufacturing; whole- ; trade; industrial composite. *Catalogue 72-002, February*

erage Weekly Hours, Average Hourly Earnings, Average Vages of Hourly-rated Wage-earners 1961-1967 for:

Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n^o 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n^o 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n^o *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n^o *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n^o 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n^o *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972* and *1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construct l'entretien des routes et des ponts. Voir le n^{O} *72-002 catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moye gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlant - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catalo décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Ave Weekly Hours and Average Hourly Earnings, Monthly and An Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles pub pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catalo *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-19*

Toutes les autres données mensuelles et annuelles disponibles po période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-20* catalogue, *1968-1970.*

C. 1971-1973

Indices de l'emploi et gains hebdomadaires moyens, 1973, Car Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magas rayons, le commerce de détail, le commerce et l'ensemble des indus Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourc ge de femmes, le nombre de salariés, rémunération hebdomadaire moyen. janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien routes et ponts, transports, transports, communication et autres ser publics et l'ensemble des industries. Voir le n^{O} *72-002 au catal septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures rées), rémunération hebdomadaire moyenne des employés, ensembl ouvriers, heures hebdomadaires– moyennes et rémunération horaire mo des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Ca et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-0 catalogue, septembre 1974.*

Toutes les autres séries sont publiées dans les bulletins mensue n^{O} *72-002* au catalogue pour les années *1971, 1972* et *1973.*

(1) Les numéros des publications susmentionnées renferment les der données disponibles pour toute série donnée. Les données relat ces séries figurant dans d'autres numéros de ces publications pe avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour Section of the Labour Division, through a mail survey, collects tion on employment, earnings and hours which are tabulated nt the data in this report. Data which, prior to March 1971, ublished separately in "Employment and Average Weekly and Salaries" (Catalogue 72-002) and in "Man-Hours and Earnings" (Catalogue 72-003) have been combined in this The following notes explain the concepts and methods used in ey.

ng Unit

The reporting unit is usually the establishment, that is, the industrial unit which is a separate operating entity capable of g all elements of basic industrial statistics including informa- inputs and outputs needed to calculate "value added" or nark-up' or "gross profit" as well as data on employment and For purposes of detailed geographic statistics, the Section quests that the reporting unit be a sub-establishment unit lthough not capable of reporting all basic statistics, can report nent and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, es having 20 or more employees in any month of the year. , all the establishments of a multi-establishment company are if the company had 20 or more employees in total in any the year even though any single establishment may have had w employees.

e Period

onceptually, the figures refer to the last seven days in the months. In practice, few establishments keep payroll records precisely this period and establishments are therefore l to report for their last pay period or pay periods in each

When the reported pay period is longer than one week, the ata are reduced to one week's proportion of the totals. The rs of the fractions used in calculating these weekly equiv- 5, 6 or 7, depending on the number of working days per which the establishment operated in the pay period. The tors of the fractions are the number of working days in the ay periods. For employees paid at annual or monthly rates, nings are not affected by the number of working days in the ted proportions are used to reduce the earnings to a weekly out regard to the length of the calendar month.

hen a holiday, layoff or industrial dispute occurs in an ent that reports a pay period that is different from the last s of the month, an adjustment is made to the data, if the yoff or dispute affects the two periods differently, so that the rately reflects the actual situation during the reference

industries are covered by the survey, with the exceptions of , fishing and trapping, education and related services, welfare services, religious organizations, private house- ublic administration and defence. Because of the limitation ey to larger firms, there is somewhat uneven coverage of yment by industry as well as by province and urban area. ntage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n^{O} 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n^{O} 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des g établissements aux petits établissements. Cette proportion varie consi blement d'une branche à l'autre. Le tableau suivant indique le c annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du c estimatif de l'emploi total, ce dernier étant la somme des résulta l'enquête sur l'emploi et la rémunération et des résultats d'une enquê échantillon auprès des petites entreprises ainsi que d'autres enq supplémentaires. Des estimations du nombre total d'employés son bliées sous le titre "Estimations du nombre d'employés par province industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1972(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sa survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquêt l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enq supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulemer services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, reli organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres soci les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'en dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les ser non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estim employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commer de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couvert l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la constru ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province, à un (selon la définition établie par le recensement de la population) et, lieu, à une région urbaine. Les données de Terre-Neuve, de du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswi agrégées dans certains tableaux présentant des statistiques pour la de l'Atlantique. De la même manière, les données du Manitoba, Saskatchewan et de l'Alberta sont additionnées pour former le tot région des Prairies. On a retenu la définition de "région métropoli établie pour le recensement de la population dans le cas des d régions urbaines. Les définitions employées pour les autres régions u sont fondées sur le concept du marché du travail; les régions en ordinairement le territoire avoisinant avec le centre urbain. On peut

lls and Labour Income Section. The reporting units not located tabulated urban area are included in county, provincial and nal totals.

trial Classification

All establishments are assigned to an industrial class on the of their principal activity. If an establishment is engaged in a er of different industrial activities, its principal activity is mined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different ies. When an establishment has very mixed activities, it is not arily shifted from industry to industry each time its principal y changes.

Statistics from the survey are based on the 1960 Standard rial Classification. A description of the various industries and s of industries may be found in the "Standard Industrial ication Manual', Catalogue 12-501 (1960). The "S.I.C. code" ns in the main tables refer to this manual. The tables contain a roupings not found in the Standard Industrial Classification. include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

ient

mployment data represent all employees on the payrolls of units in the reference period. The employee concept excludes owners or partners in unincorporated businesses, non-directors, the self-employed, unpaid family workers, persons n-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n^{O} 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404)et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries'. These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévol pensionnés, les travailleurs à domicile et les personnes fournissa services à forfait ou sous contrat. Sont donc considérés comme salari les ouvriers et tous les employés qui sont rémunérés pour leurs servi qui sont en congé payé pendant la période de référence, à l'excepti occasionnels ayant travaillé moins de sept heures pendant la péric paye. Les *salariés réguliers à temps partiel* sont comptés parmi les s quel que soit le nombre d'heures qu'ils travaillent pendant la péric paye.

Par exemple, une personne travaillant une partie de la péric référence et en chômage ou en grève le reste de la période, est co comme occupée. Les salariés qui ne sont pas rémunérés pour to période de référence à cause d'une grève ou des conséquences d'une ou les personnes en congé sans paye ne figurent pas parmi les pers occupées.

Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le de rémunération. Les ouvriers sont les personnes travaillant effectiv à la production et à des opérations assimilées, en particulier le per d'entretien, d'entrepôt et de livraison, le personnel de sécurit chauffeurs-livreurs, les vendeurs itinérants, les commis des magas détail, les serveuses et les contremaîtres remplissant des fonctions gues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers p être rémunérés sur une base mensuelle fixe ou suivant le nombre d' travaillées. L'enquête couvre tous les ouvriers quel que soit leur m rémunération et les gains hebdomadaires moyens sont calculés pou Toutefois, les heures hebdomadaires moyennes et les rémunér horaires moyennes sont calculées uniquement d'après les données re aux ouvriers dont on peut connaître le nombre d'heures de travail.

Employés

Les employés comprennent les directeurs, les administrateu surveillants, les cadres techniques et spécialisés, les agents à la comm les voyageurs de commerce relevant directement de l'administratio que les employés de bureau, les commis et les travailleurs assimi bureau et à l'usine. Les membres des conseils d'administration d'en ses constituées en corporation qui travaillent dans l'entrepris également compris dans cette catégorie.

Rémunération

Les rémunérations des ouvriers et des employés représent gains bruts de la semaine, avant toutes déductions d'impôt, de coti d'assurance-chômage, etc. La rémunération brute comprend les sala rémunération au taux ordinaire, la rémunération du travail aux pièce commissions régulières, les primes au rendement, les primes de vie c autres gratifications versées régulièrement, les gains pour travail s mentaire et les paiements versés aux personnes en congé payé pen semaine de l'enquête. Le concept de rémunération ne comprend frais supplémentaires de main-d'oeuvre tels que les cotisations d ployeur à la caisse d'assurance-chômage, aux régimes d'assurance-m à la caisse d'indemnisation des accidents de travail et à d'autres régi prévoyance; il ne comprend pas non plus le coût du matériel, la val la pension, les paiements en nature, les frais de déplacement, les inde de retraite, les gratifications versées à intervalles irréguliers et peu fré ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gai ouvriers et des employés. Les publications antérieures à mars renfermaient des données réunies sous le titre "Average Weekly and Salaries". Ces données sont comparables aux "rémunérations madaires moyennes" des salariés pris en compte ici. Ce système

present publication. The system now provides separate earnings for all wage-earners and salaried employees whereas formerly "Average Weekly Wages" for hourly-rated wage-earners was able.

Numbers

Index numbers are calculated by dividing the current month's oyment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all oyment reported by establishments that meet our size criteria in rrent period. Base year employment consists of the employment tablishments that had 20 or more employees in any month of The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employ- indexes those regularly recurring fluctuations known as "sea- variations'. The adjusted index numbers thus approximate the cycle, and irregular components of the time series. The X-11 nt of the U.S. Census Method II is used to calculate the nally-adjusted index numbers; additional seasonally-adjusted may be found in "Employment, earnings and hours, season- adjusted series January 1961 - December 1971" (Catalogue 6).

ges

The average weekly hours figure is obtained by dividing total man-hours by the number of wage-earners who worked those Average hourly earnings are obtained by dividing total weekly of hourly-rated wage-earners by their total weekly hours. Both se averages apply only to the subset of wage-earners for whom details are reported. It should be noted that total hours include ne hours actually worked and that the wage-earner total es part-time wage-earners and casuals working more than seven during one week. Annual statistics are calculated from the ate of the monthly data, with the exception of those shown as inary(p); the latter are based on monthly averages.

ical Presentation

Each month, statistics for three months are prepared by the y Employment, Payrolls and Labour Income Section. Data for t, most current month, are entitled first estimates. They are on a limited number of returns (usually about 50%) and only aggregated figures are released in the Statistics Canada Daily e First Estimates table of this publication. Simultaneously, estimates are prepared for the month immediately preceding st current data and third estimates for the month prior to that. these latter estimates are of higher quality than that of the first : of the higher rate of returns (typically, 65% and 75%, vely). Consequently full details for both months are shown his publication.

After completion of the third estimate, further revisions to the made to incorporate late returns and corrected information from our respondents or to rectify mechanical errors. Larger ons are calculated immediately and appear in the historical cial tables and in column for the previous year in tables 2, 3 this publication. The smaller corrections are completed in the abulations when all returns are retabulated to produce revised nd annual averages; these data are contained in catalogue nd 72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n^{o} 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indicat contraire) les colonnes laissées en blanc dans le cas des employés et ouvriers indiqués séparément, signifient que les données relatives ouvriers pour lesquels les heures sont enregistrées ne sont disponibles.

COMMENTARY

First Estimates(1) – April 1976
(Seasonally-adjusted)

The Canada industrial composite(2) index of employment 61 = 100) for April showed a 0.4 per cent rise from March. All ustry divisions except manufacturing contributed to the rise.

Average weekly earnings increased 1.4 per cent at the Canada ıstrial composite level. All industry divisions except manufactur- construction and transportation, communication and other ties posted gains.

Preliminary Data(1) – March 1976

loyment (Seasonally-adjusted)

The Canada industrial composite employment index showed ight increase from February to March 1976. Manufacturing ained virtually unchanged, as losses in the durable component t gains in the non-durable component. Employment increases noted in transportation, communication and other utilities, ally reflecting the resolution of industrial disputes in Manitoba. eases were also posted in service, in construction, in forestry, and nance, insurance and real estate. Trade and mining recorded nes.

ings and Hours

Seasonally-adjusted, average weekly earnings showed no ge at the Canada industrial composite level. Gains were recorded l regions except Quebec and British Columbia. All industry ions recorded gains except manufacturing, construction, and portation, communication and other utilities.

Unadjusted for seasonal variation, average weekly earnings 0.6 per cent to $221.43 at the Canada industrial composite level. ases were recorded in all regions and all industry divisions with xceptions of construction and transportation, communication and utilities. Average weekly hours declined in mining and construc- and remained constant in manufacturing; average hourly earn- ncreased in mining and manufacturing but showed no change in ruction.

ce note on Statistical Presentation under Concepts and Methods t the back of this publication.

ndustrial Composite is the sum of all industries with the exception f agriculture, fishing and trapping, education and related ervices, health and welfare services, religious organizations, rivate households and public administration and defence. All tatistics are based on returns received from employers having wenty (20) or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – Avril 1976
(chiffres désaisonnalisés)

L'indice composite(2) de l'emploi dans les activités économiques du Canada (1961 = 100) révèle une augmentation de 0.4% de mars à avril. Toutes les divisions de l'activité économique à l'exception des manufactures ont contribué à cette hausse.

Les gains hebdomadaires moyens au niveau de l'ensemble des activités économiques du Canada ont progressé de 1.4%. Toutes les divisions de l'activité économique ont enregistré des hausses à l'exception des manufactures, de la construction et des transports, communications et autres services publics.

Données provisoires(1) – Mars 1976

Emploi (chiffres désaisonnalisés)

L'indice composite de l'emploi dans les activités économiques du Canada a légèrement progressé de février à mars 1976. L'emploi dans les manufactures n'a pratiquement pas changé puisque les baisses dans les biens durables ont compensé les hausses dans les biens non durables. Des hausses de l'emploi ont été observées dans les transports, communications et autres services publics, ce qui traduit en partie le règlement des conflits du travail au Manitoba. On a également enregistré des augmentations dans les services, la construction, le forestage et les finances, assurances et immeuble. L'emploi dans le commerce et les mines a diminué.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada n'ont révélé aucune variation. Toutes les régions, sauf le Québec et la Colombie-Britannique, et toutes les divisions de l'activité économique, à l'exception des manufactures, de la construction et des transports, communications et autres services publics, ont enregistré des hausses.

Les gains hebdomadaires moyens, non désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada ont progressé de 0.6% pour s'établir à $221.43. On a observé des hausses dans toutes les régions et dans toutes les divisions de l'activité économique à l'exception de la construction et des transports, communications et autres services publics. Le nombre moyen d'heures hebdomadaires travaillées a diminué dans les mines et la construction et est demeuré stable dans les manufactures; les gains horaires moyens ont augmenté dans les mines et les manufactures, mais n'ont pas varié dans la construction.

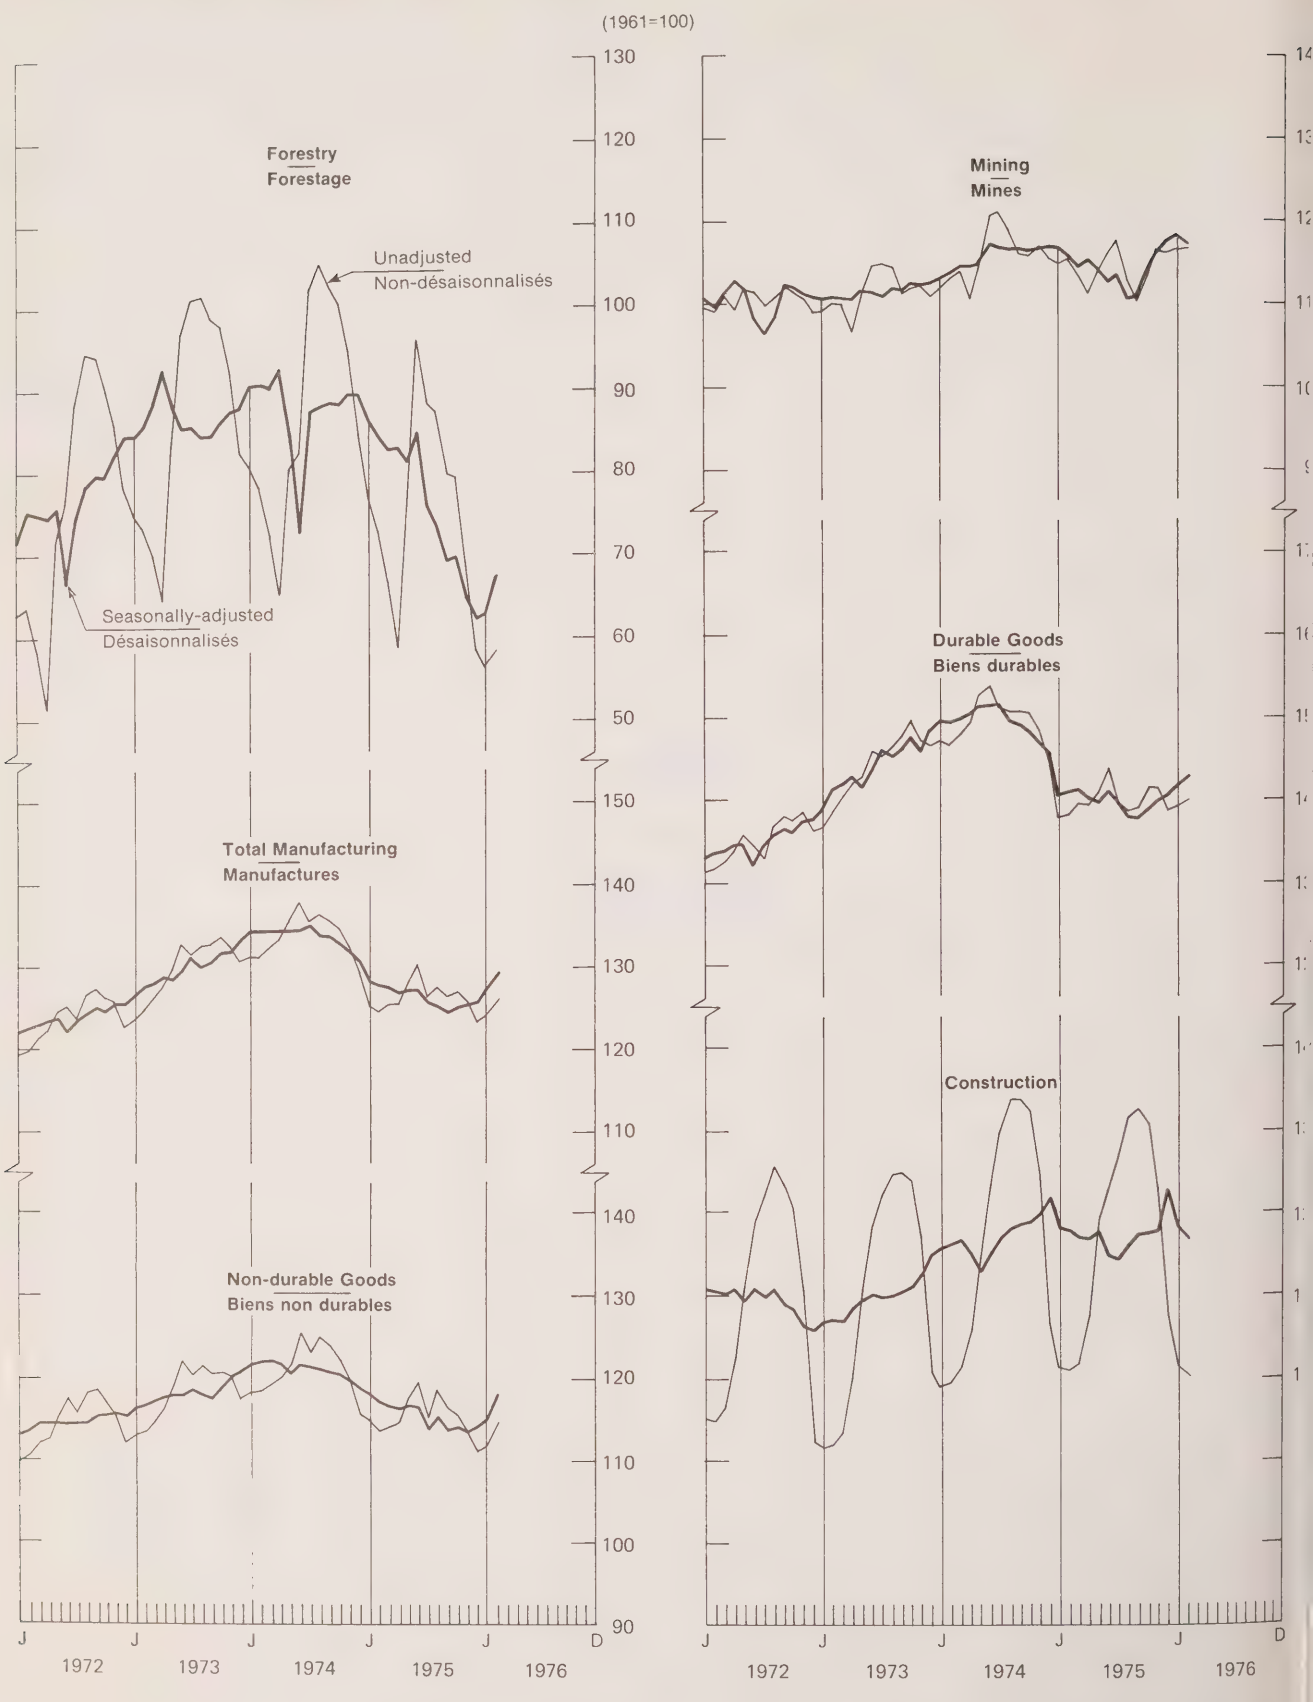

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.

(2) L'indice composite comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt (20) salariés au cours d'un mois quelconque de l'année.

1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour me Section of the Labour Division, through a mail survey, collects rmation on employment, earnings and hours which are tabulated resent the data in this report. Data which, prior to March 1971, published separately in "Employment and Average Weekly es and Salaries" (Catalogue 72-002) and in "Man-Hours and rly Earnings" (Catalogue 72-003) have been combined in this rt. The following notes explain the concepts and methods used in urvey.

rting Unit

The reporting unit is usually the establishment, that is, the lest industrial unit which is a separate operating entity capable of rting all elements of basic industrial statistics including informa- on inputs and outputs needed to calculate "value added" or ss mark-up' or "gross profit" as well as data on employment and olls. For purposes of detailed geographic statistics, the Section requests that the reporting unit be a sub-establishment unit h, although not capable of reporting all basic statistics, can report oyment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, anies having 20 or more employees in any month of the year. ever, all the establishments of a multi-establishment company are led if the company had 20 or more employees in total in any h of the year even though any single establishment may have had a few employees.

ence Period

Conceptually, the figures refer to the last seven days in the ed months. In practice, few establishments keep payroll records ng precisely this period and establishments are therefore tted to report for their last pay period or pay periods in each .

When the reported pay period is longer than one week, the l data are reduced to one week's proportion of the totals. The ators of the fractions used in calculating these weekly equiv- are 5, 6 or 7, depending on the number of working days per in which the establishment operated in the pay period. The inators of the fractions are the number of working days in the nt pay periods. For employees paid at annual or monthly rates, earnings are not affected by the number of working days in the , fixed proportions are used to reduce the earnings to a weekly without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an shment that reports a pay period that is different from the last days of the month, an adjustment is made to the data, if the , layoff or dispute affects the two periods differently, so that the ccurately reflects the actual situation during the reference

ge

All industries are covered by the survey, with the exceptions of ture, fishing and trapping, education and related services, and welfare services, religious organizations, private house- nd public administration and defence. Because of the limitation urvey to larger firms, there is somewhat uneven coverage of nployment by industry as well as by province and urban area. rcentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employment and Average Weekly Wages and Salaries" (n° 72-002 au catalogue) et dans "Man-Hours and Hourly Earnings" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des gr établissements aux petits établissements. Cette proportion varie consic blement d'une branche à l'autre. Le tableau suivant indique le ch annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du ch estimatif de l'emploi total, ce dernier étant la somme des résultat l'enquête sur l'emploi et la rémunération et des résultats d'une enquête échantillon auprès des petites entreprises ainsi que d'autres enqu supplémentaires. Des estimations du nombre total d'employés sont bliées sous le titre "Estimations du nombre d'employés par province e industrie" (n° 72-008 au catalogue).

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sam survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête s l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquê supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, religi organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - C pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres social les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emp dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les servi non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimat employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commercia de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts p l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la constructi ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province, à un co (selon la définition établie par le recensement de la population) et, s'il lieu, à une région urbaine. Les données de Terre-Neuve, de l du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick agrégées dans certains tableaux présentant des statistiques pour la ré de l'Atlantique. De la même manière, les données du Manitoba, d Saskatchewan et de l'Alberta sont additionnées pour former le total c région des Prairies. On a retenu la définition de "région métropolitai établie pour le recensement de la population dans le cas des dix-n régions urbaines. Les définitions employées pour les autres régions urba sont fondées sur le concept du marché du travail; les régions englol ordinairement le territoire avoisinant avec le centre urbain. On peut obt

olls and Labour Income Section. The reporting units not located tabulated urban area are included in county, provincial and nal totals.

trial Classification

All establishments are assigned to an industrial class on the of their principal activity. If an establishment is engaged in a er of different industrial activities, its principal activity is mined by the largest net value added by these activities, or where not possible, by the gross revenue obtained from the different ties. When an establishment has very mixed activities, it is not sarily shifted from industry to industry each time its principal ty changes.

Statistics from the survey are based on the 1960 Standard trial Classification. A description of the various industries and s of industries may be found in the "Standard Industrial fication Manual', Catalogue 12-501 (1960). The "S.I.C. code" ns in the main tables refer to this manual. The tables contain a roupings not found in the Standard Industrial Classification. include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided nto spun yarn and fabrics (2011) and filament yarn and staple ibres (2012).

ment

Employment data represent all employees on the payrolls of g units in the reference period. The employee concept excludes ; owners or partners in unincorporated businesses, non- directors, the self-employed, unpaid family workers, persons on-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n^{o} 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404)et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries'. These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles, pensionnés, les travailleurs à domicile et les personnes fournissant services à forfait ou sous contrat. Sont donc considérés comme salariés t les ouvriers et tous les employés qui sont rémunérés pour leurs services qui sont en congé payé pendant la période de référence, à l'exception occasionnels ayant travaillé moins de sept heures pendant la période paye. Les *salariés réguliers à temps partiel* sont comptés parmi les salar quel que soit le nombre d'heures qu'ils travaillent pendant la période paye.

Par exemple, une personne travaillant une partie de la période référence et en chômage ou en grève le reste de la période, est comp comme occupée. Les salariés qui ne sont pas rémunérés pour toute période de référence à cause d'une grève ou des conséquences d'une grè ou les personnes en congé sans paye ne figurent pas parmi les personn occupées.

Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le mo de rémunération. Les ouvriers sont les personnes travaillant effectivem à la production et à des opérations assimilées, en particulier le person d'entretien, d'entrepôt et de livraison, le personnel de sécurité, chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins détail, les serveuses et les contremaîtres remplissant des fonctions ana gues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peuv être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heu travaillées. L'enquête couvre tous les ouvriers quel que soit leur mode rémunération et les gains hebdomadaires moyens sont calculés pour to Toutefois, les heures hebdomadaires moyennes et les rémunératio horaires moyennes sont calculées uniquement d'après les données relati aux ouvriers dont on peut connaître le nombre d'heures de travail.

Employés

Les employés comprennent les directeurs, les administrateurs, surveillants, les cadres techniques et spécialisés, les agents à la commissi les voyageurs de commerce relevant directement de l'administration, ai que les employés de bureau, les commis et les travailleurs assimilés, bureau et à l'usine. Les membres des conseils d'administration d'entrep ses constituées en corporation qui travaillent dans l'entreprise s également compris dans cette catégorie.

Rémunération

Les rémunérations des ouvriers et des employés représentent gains bruts de la semaine, avant toutes déductions d'impôt, de cotisatio d'assurance-chômage, etc. La rémunération brute comprend les salaires, rémunération au taux ordinaire, la rémunération du travail aux pièces et commissions régulières, les primes au rendement, les primes de vie chère autres gratifications versées régulièrement, les gains pour travail supp mentaire et les paiements versés aux personnes en congé payé pendant semaine de l'enquête. Le concept de rémunération ne comprend pas frais supplémentaires de main-d'oeuvre tels que les cotisations de l'e ployeur à la caisse d'assurance-chômage, aux régimes d'assurance-malad à la caisse d'indemnisation des accidents de travail et à d'autres régimes prévoyance; il ne comprend pas non plus le coût du matériel, la valeur la pension, les paiements en nature, les frais de déplacement, les indemni de retraite, les gratifications versées à intervalles irréguliers et peu fréquer ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains d ouvriers et des employés. Les publications antérieures à mars 19 renfermaient des données réunies sous le titre "Average Weekly Wag and Salaries". Ces données sont comparables aux "rémunérations hebd madaires moyennes" des salariés pris en compte ici. Ce système perm

ent publication. The system now provides separate earnings
all wage-earners and salaried employees whereas formerly
verage Weekly Wages" for hourly-rated wage-earners was
e.

umbers

ndex numbers are calculated by dividing the current month's
ent (or payroll) by the monthly-average of the total base
ployment (or payroll). The current employment consists of all
ent reported by establishments that meet our size criteria in
nt period. Base year employment consists of the employment
lishments that had 20 or more employees in any month of
e payroll index is calculated in a similar fashion.

easonally-adjusted index numbers remove from the employ-
lexes those regularly recurring fluctuations known as "sea-
iations'. The adjusted index numbers thus approximate the
cle, and irregular components of the time series. The X-11
of the U.S. Census Method II is used to calculate the
y-adjusted index numbers; additional seasonally-adjusted
y be found in "Employment, earnings and hours, season-
justed series January 1961 - December 1971" (Catalogue

e average weekly hours figure is obtained by dividing total
an-hours by the number of wage-earners who worked those
erage hourly earnings are obtained by dividing total weekly
hourly-rated wage-earners by their total weekly hours. Both
verages apply only to the subset of wage-earners for whom
tails are reported. It should be noted that total hours include
hours actually worked and that the wage-earner total
art-time wage-earners and casuals working more than seven
ing one week. Annual statistics are calculated from the
of the monthly data, with the exception of those shown as
y(p); the latter are based on monthly averages.

Presentation

ch month, statistics for three months are prepared by the
mployment, Payrolls and Labour Income Section. Data for
nost current month, are entitled first estimates. They are
a limited number of returns (usually about 50%) and only
regated figures are released in the Statistics Canada Daily
irst Estimates table of this publication. Simultaneously,
imates are prepared for the month immediately preceding
urrent data and third estimates for the month prior to that.
se latter estimates are of higher quality than that of the first
f the higher rate of returns (typically, 65% and 75%,
). Consequently full details for both months are shown
publication.

r completion of the third estimate, further revisions to the
ade to incorporate late returns and corrected information
m our respondents or to rectify mechanical errors. Larger
are calculated immediately and appear in the historical
tables and in column for the previous year in tables 2, 3
s publication. The smaller corrections are completed in the
lations when all returns are retabulated to produce revised
annual averages; these data are contained in catalogue
72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n^{o} 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indicati contraire) les colonnes laissées en blanc dans le cas des employés et ouvriers indiqués séparément, signifient que les données relatives a ouvriers pour lesquels les heures sont enregistrées ne sont disponibles.

COMMENTARY

First estimates(1) – May 1976
(Seasonally-adjusted)

The first estimate of the Canada industrial composite(2) index
nployment for larger-firms (1961 = 100) showed a 0.7% decline
April to May. Employment was reduced in all industry divisions
)t forestry and finance, insurance and real estate, and in all
ns except British Columbia.

Average weekly earnings rose 0.3% at the national industrial
osite level in May. Gains were recorded in forestry, manufactur-
onstruction and service; the remaining industry divisions showed
ies. All five regions participated in the overall advance.

Preliminary Data(1) – April 1976

)yment (Seasonally-adjusted)

Preliminary data for April 1976 showed a 0.3% advance in the
la index of industrial composite employment. For the most part,
se reflected employment gains in the service-producing indus-
The largest increases were in railway transport, truck transport,
ay and bridge maintenance, food stores, insurance and real
and hotels, restaurants and taverns. Manufacturing showed
lly no change from the previous month as gains in wood
cts, transportation equipment and chemicals and chemical
:ts were balanced by declines in food and beverages and textile
:ts.

gs and Hours

Seasonally-adjusted, average weekly earnings rose 1.3% at the
a industrial composite level. Gains were recorded in all industry
ns, except construction and in all provinces.

Unadjusted for seasonal variation, average weekly earnings
Canada industrial composite rose 1.2% to 224.52. Average
earnings increased by 5 cents in manufacturing and by 1 cent
ing, while construction showed a 2 cent decline. Average
hours decreased in all three industry divisions from March to

ee note on Statistical Presentation under Concepts and Meth-
ds at the back of this publication.
ndustrial Composite is the sum of all industries with the
xception of agriculture, fishing and trapping, education and
:lated services, health and welfare services, religious organi-
ations, private households and public administration and
efence. All statistics are based on returns received from
nployers having twenty (20) or more employees in any month
the year.

OBSERVATIONS

Premières estimations(1) – Mai 1976
(chiffres désaisonnalisés)

Les premières estimations de l'indice composite(2) de l'emploi dans les activités économiques du Canada pour les entreprises les plus importantes (1961 = 100) a accusé une baisse de 0.7% d'avril à mai. On a observé des baisses de l'emploi dans toutes les divisions de l'activité économique, à l'exception du forestage et des finances, assurances et immeuble, et dans toutes les régions à l'exception de la Colombie-Britannique.

Les gains hebdomadaires moyens ont augmenté de 0.3% en mai au niveau de l'ensemble des activités économiques du Canada. On a observé une progression dans le forestage, les manufactures, la construction et les services; les autres divisions de l'activité économique ont accusé des baisses. Les cinq régions ont toutes contribué à la progression générale.

Données provisoires(1) – Avril 1976

Emploi (chiffres désaisonnalisés)

Les données provisoires pour avril 1976 font ressortir une progression de 0.3% de l'indice composite de l'emploi dans les activités économiques du Canada. Cette progression est surtout attribuable aux hausses de l'emploi dans les industries de services. Les augmentations les plus importantes se retrouvent dans les transports ferroviaires, les transports par camion, l'entretien des routes et ponts, les magasins d'alimentation, les assurances et immeuble et les hôtels, restaurants et tavernes. L'indice pour les manufactures n'a pratiquement pas varié par rapport au mois précédent, car les gains enregistrés dans les produits du bois, le matériel de transport et l'industrie chimique et des produits connexes ont compensé les baisses dans les aliments et boissons et dans les produits du textile.

Gains et heures de travail

Les gains hebdomadaires moyens, désaisonnalisés, ont augmenté de 1.3% au niveau de l'ensemble des activités économiques du Canada. Toutes les provinces et toutes les divisions de l'activité économique, à l'exception de la construction, ont enregistré des gains.

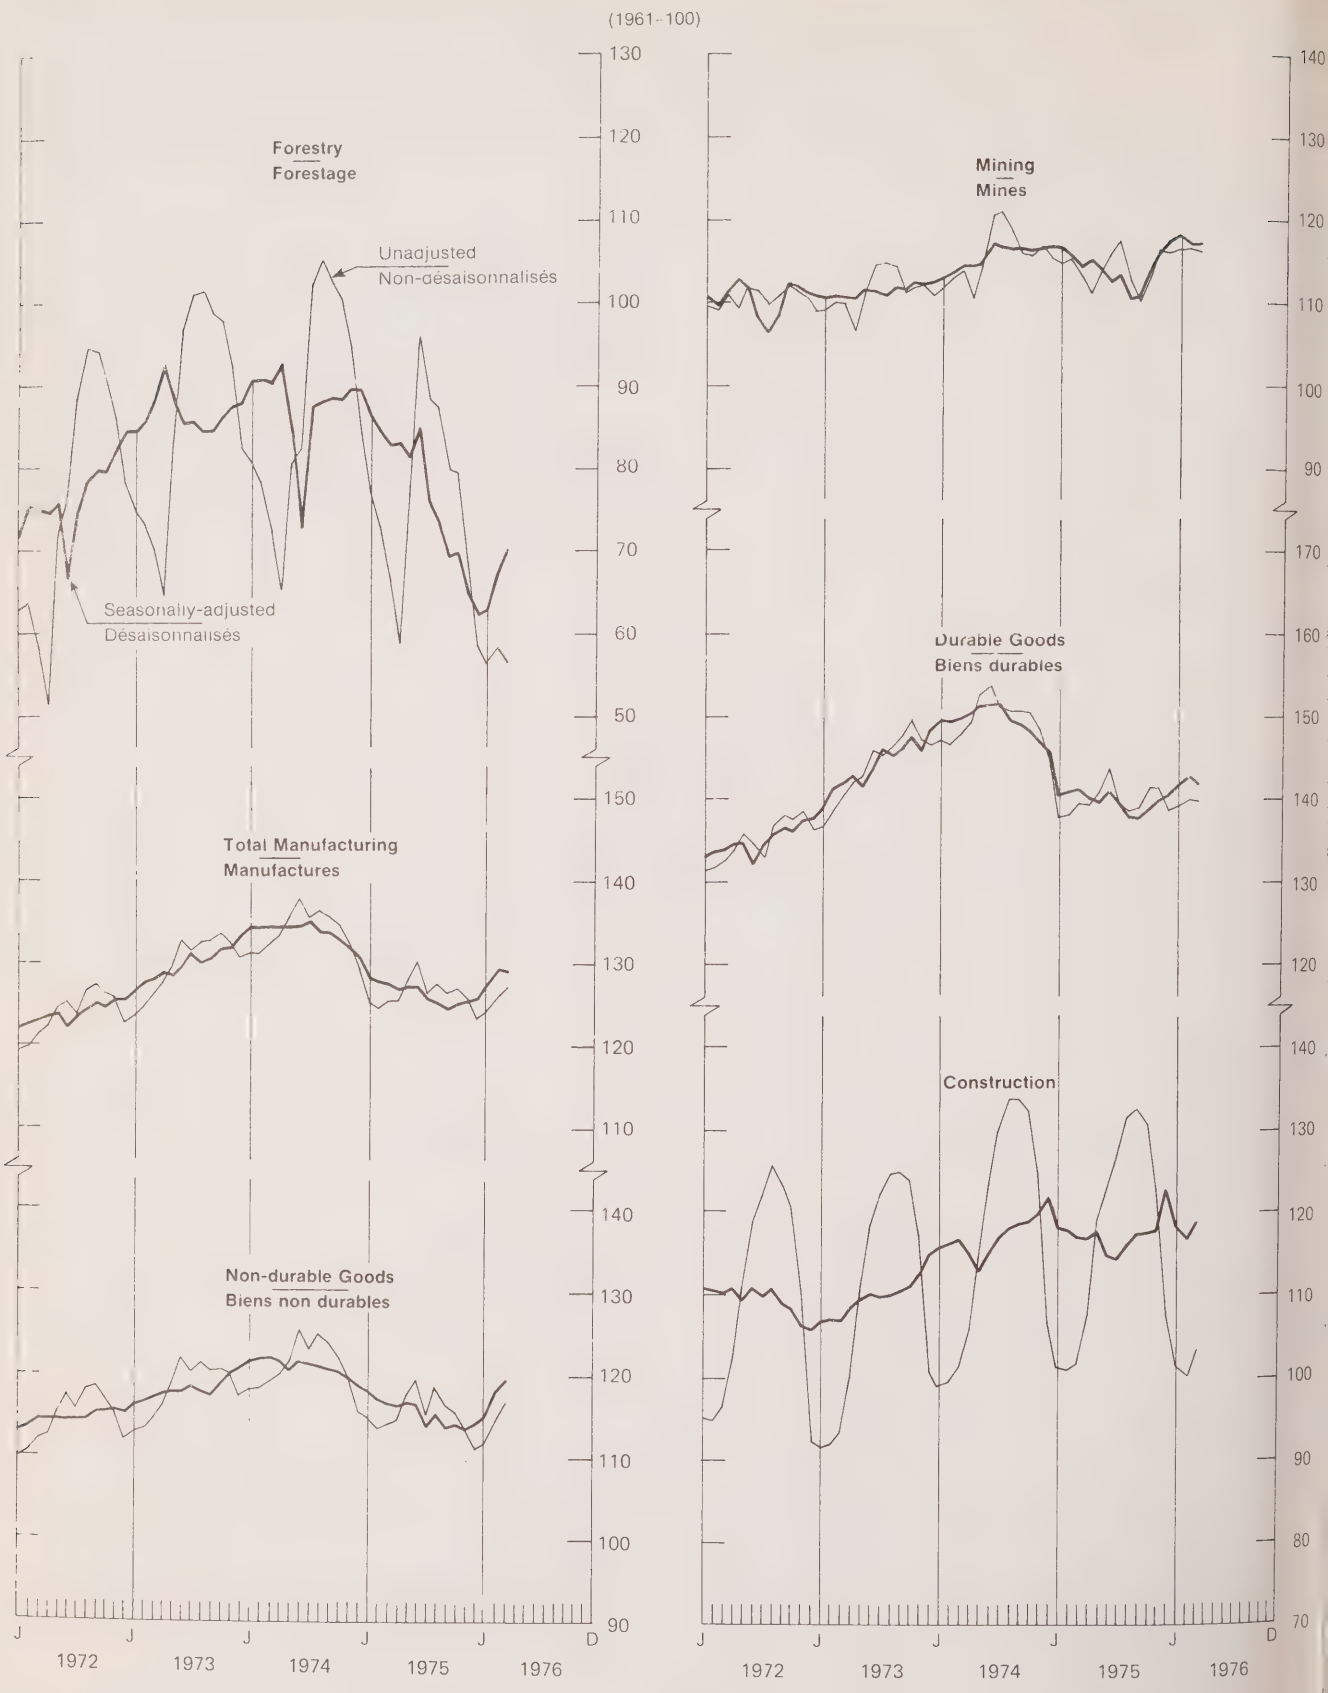

Les gains hebdomadaires moyens, non désaisonnalisés, au niveau de l'ensemble des activités économiques du Canada ont progressé de 1.2% pour s'établir à 224.52. Les gains horaires moyens ont augmenté de 5 cents dans les manufactures et de 1 cent dans les mines; ils ont diminué de 2 cents dans la construction. Le nombre moyen d'heures hebdomadaires a diminué de mars à avril dans les trois divisions de l'activité économique.

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'indice composite comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt(20) salariés au cours d'un mois quelconque de l'année.

1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistics is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est très répandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

Nombre d'employés, ensemble des ouvriers, ouvriers (heures d rées), rémunération hebdomadaire moyenne des employés, ensemble ouvriers, heures hebdomadaires– moyennes et rémunération horaire moy des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Can et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-00 catalogue, septembre 1974.*

Toutes les autres séries sont publiées dans les bulletins mensuel n^{O} *72-002* au catalogue pour les années *1971, 1972* et *1973.*

(1) Les numéros des publications susmentionnées renferment les derni données disponibles pour toute série donnée. Les données relativ ces séries figurant dans d'autres numéros de ces publications peu avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour ome Section of the Labour Division, through a mail survey, collects rmation on employment, earnings and hours which are tabulated resent the data in this report. Data which, prior to March 1971, e published separately in "Employment and Average Weekly ges and Salaries" (Catalogue 72-002) and in "Man-Hours and rly Earnings" (Catalogue 72-003) have been combined in this rt. The following notes explain the concepts and methods used in survey.

orting Unit

The reporting unit is usually the establishment, that is, the llest industrial unit which is a separate operating entity capable of rting all elements of basic industrial statistics including informa- on inputs and outputs needed to calculate "value added" or ss mark-up' or "gross profit" as well as data on employment and olls. For purposes of detailed geographic statistics, the Section n requests that the reporting unit be a sub-establishment unit h, although not capable of reporting all basic statistics, can report loyment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, panies having 20 or more employees in any month of the year. ever, all the establishments of a multi-establishment company are ded if the company had 20 or more employees in total in any th of the year even though any single establishment may have had a few employees.

rence Period

Conceptually, the figures refer to the last seven days in the fied months. In practice, few establishments keep payroll records ring precisely this period and establishments are therefore itted to report for their last pay period or pay periods in each h.

When the reported pay period is longer than one week, the ll data are reduced to one week's proportion of the totals. The rators of the fractions used in calculating these weekly equiv- are 5, 6 or 7, depending on the number of working days per in which the establishment operated in the pay period. The minators of the fractions are the number of working days in the ent pay periods. For employees paid at annual or monthly rates, e earnings are not affected by the number of working days in the h, fixed proportions are used to reduce the earnings to a weekly without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an ishment that reports a pay period that is different from the last days of the month, an adjustment is made to the data, if the ty, layoff or dispute affects the two periods differently, so that the accurately reflects the actual situation during the reference l.

age

All industries are covered by the survey, with the exceptions of lture, fishing and trapping, education and related services, and welfare services, religious organizations, private house- and public administration and defence. Because of the limitation survey to larger firms, there is somewhat uneven coverage of mployment by industry as well as by province and urban area. ercentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employ*ment and Average Weekly Wages and Salaries*" (n° 72-002 au catalogue) et dans "Man-Hours *and Hourly Earnings*" (n° 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des g établissements aux petits établissements. Cette proportion varie consi blement d'une branche à l'autre. Le tableau suivant indique le c annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du c estimatif de l'emploi total, ce dernier étant la somme des résulta l'enquête sur l'emploi et la rémunération et des résultats d'une enquêt échantillon auprès des petites entreprises ainsi que d'autres enq supplémentaires. Des estimations du nombre total d'employés son bliées sous le titre "Estimations du nombre d'employés par province e industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

Emploi des grandes entreprises en tant que pourcentage de l'estimation de l'emploi total par branche d'activité pour le Canada et les provinces, moyennes annuelles de 1972(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sam survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquê supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, religi organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - C pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres social les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emp dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les servi non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimat employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commercia de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts p l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la constructi ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province, à un co (selon la définition établie par le recensement de la population) et, s'il lieu, à une région urbaine. Les données de Terre-Neuve, de l' du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick s agrégées dans certains tableaux présentant des statistiques pour la rég de l'Atlantique. De la même manière, les données du Manitoba, de Saskatchewan et de l'Alberta sont additionnées pour former le total d région des Prairies. On a retenu la définition de "région métropolitai établie pour le recensement de la population dans le cas des dix-n régions urbaines. Les définitions employées pour les autres régions urbai sont fondées sur le concept du marché du travail; les régions englob ordinairement le territoire avoisinant avec le centre urbain. On peut obt

rolls and Labour Income Section. The reporting units not located a tabulated urban area are included in county, provincial and onal totals.

ıstrial Classification

All establishments are assigned to an industrial class on the s of their principal activity. If an establishment is engaged in a ıber of different industrial activities, its principal activity is rmined by the largest net value added by these activities, or where is not possible, by the gross revenue obtained from the different ities. When an establishment has very mixed activities, it is not ssarily shifted from industry to industry each time its principal ity changes.

Statistics from the survey are based on the 1960 Standard strial Classification. A description of the various industries and ps of industries may be found in the "Standard Industrial sification Manual', Catalogue 12-501 (1960). The "S.I.C. code" nns in the main tables refer to this manual. The tables contain a groupings not found in the Standard Industrial Classification. e include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

yment

Employment data represent all employees on the payrolls of ng units in the reference period. The employee concept excludes ıg owners or partners in unincorporated businesses, non-g directors, the self-employed, unpaid family workers, persons non-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n^{O} 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404)et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries". These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles pensionnés, les travailleurs à domicile et les personnes fournissant services à forfait ou sous contrat. Sont donc considérés comme salariés les ouvriers et tous les employés qui sont rémunérés pour leurs servic qui sont en congé payé pendant la période de référence, à l'exceptior occasionnels ayant travaillé moins de sept heures pendant la period paye. Les *salariés réguliers à temps partiel* sont comptés parmi les sal quel que soit le nombre d'heures qu'ils travaillent pendant la period paye.

Par exemple, une personne travaillant une partie de la period référence et en chômage ou en grève le reste de la période, est com comme occupée. Les salariés qui ne sont pas rémunérés pour tou période de référence à cause d'une grève ou des conséquences d'une gr ou les personnes en congé sans paye ne figurent pas parmi les perso occupées.

Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le m de rémunération. Les ouvriers sont les personnes travaillant effectiver à la production et à des opérations assimilées, en particulier le perso d'entretien, d'entrepôt et de livraison, le personnel de sécurité, chauffeurs-livreurs, les vendeurs itinérants, les commis des magasin détail, les serveuses et les contremaîtres remplissant des fonctions an gues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peu être rémunérés sur une base mensuelle fixe ou suivant le nombre d'he travaillées. L'enquête couvre tous les ouvriers quel que soit leur mod rémunération et les gains hebdomadaires moyens sont calculés pour t Toutefois, les heures hebdomadaires moyennes et les rémunérat horaires moyennes sont calculées uniquement d'après les données relat aux ouvriers dont on peut connaître le nombre d'heures de travail.

Employés

Les employés comprennent les directeurs, les administrateurs surveillants, les cadres techniques et spécialisés, les agents à la commiss les voyageurs de commerce relevant directement de l'administration, a que les employés de bureau, les commis et les travailleurs assimilés bureau et à l'usine. Les membres des conseils d'administration d'entre ses constituées en corporation qui travaillent dans l'entreprise s également compris dans cette catégorie.

Rémunération

Les rémunérations des ouvriers et des employés représentent gains bruts de la semaine, avant toutes déductions d'impôt, de cotisati d'assurance-chômage, etc. La rémunération brute comprend les salaire rémunération au taux ordinaire, la rémunération du travail aux pièces et commissions régulières, les primes au rendement, les primes de vie chèr autres gratifications versées régulièrement, les gains pour travail supp mentaire et les paiements versés aux personnes en congé payé pendan semaine de l'enquête. Le concept de rémunération ne comprend pas frais supplémentaires de main-d'oeuvre tels que les cotisations de l'e ployeur à la caisse d'assurance-chômage, aux régimes d'assurance-mala à la caisse d'indemnisation des accidents de travail et à d'autres régimes prévoyance; il ne comprend pas non plus le coût du matériel, la valeur la pension, les paiements en nature, les frais de déplacement, les indemn de retraite, les gratifications versées à intervalles irréguliers et peu fréque ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains ouvriers et des employés. Les publications antérieures à mars 19 renfermaient des données réunies sous le titre "Average Weekly Wa and Salaries". Ces données sont comparables aux "rémunérations heb madaires moyennes" des salariés pris en compte ici. Ce système perr

present publication. The system now provides separate earnings a for all wage-earners and salaried employees whereas formerly y "Average Weekly Wages" for hourly-rated wage-earners was ilable.

ex Numbers

Index numbers are calculated by dividing the current month's ployment (or payroll) by the monthly-average of the total base employment (or payroll). The current employment consists of all ployment reported by establishments that meet our size criteria in current period. Base year employment consists of the employment stablishments that had 20 or more employees in any month of . The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employ- t indexes those regularly recurring fluctuations known as "sea- l variations". The adjusted index numbers thus approximate the d, cycle, and irregular components of the time series. The X-11 ant of the U.S. Census Method II is used to calculate the onally-adjusted index numbers; additional seasonally-adjusted s may be found in "Employment, earnings and hours, season- - adjusted series January 1961 - December 1971" (Catalogue 06).

ages

The average weekly hours figure is obtained by dividing total ly man-hours by the number of wage-earners who worked those s. Average hourly earnings are obtained by dividing total weekly s of hourly-rated wage-earners by their total weekly hours. Both ese averages apply only to the subset of wage-earners for whom ly details are reported. It should be noted that total hours include time hours actually worked and that the wage-earner total des part-time wage-earners and casuals working more than seven s during one week. Annual statistics are calculated from the gate of the monthly data, with the exception of those shown as minary(p); the latter are based on monthly averages.

stical Presentation

Each month, statistics for three months are prepared by the hly Employment, Payrolls and Labour Income Section. Data for rst, most current month, are entitled first estimates. They are l on a limited number of returns (usually about 50%) and only y aggregated figures are released in the Statistics Canada Daily the First Estimates table of this publication. Simultaneously, d estimates are prepared for the month immediately preceding ost current data and third estimates for the month prior to that. of these latter estimates are of higher quality than that of the first se of the higher rate of returns (typically, 65% and 75%, tively). Consequently full details for both months are shown this publication.

After completion of the third estimate, further revisions to the are made to incorporate late returns and corrected information ed from our respondents or to rectify mechanical errors. Larger tions are calculated immediately and appear in the historical ecial tables and in column for the previous year in tables 2, 3 of this publication. The smaller corrections are completed in the l tabulations when all returns are retabulated to produce revised s and annual averages; these data are contained in catalogue l and 72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n^{O} 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

. . . figures not appropriate or not applicable.

— nil or zero.

– – amount too small to be expressed.

p preliminary figures.

r revised figures.

x confidential to meet secrecy requirements of the Statistics Act.

NOTE

In addition, in this publication (except as otherwise noted), blanks in those columns where wage-earners and salaried employees data are shown separately indicate that representative data for wage-earners for whom hours are recorded are not available.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

. . . n'ayant pas lieu de figurer.

— néant ou zéro.

– – nombres infimes.

p nombres provisoires.

r nombres rectifiés.

x confidentiels en vertu des dispositions de la Loi sur la Statistique relatives au secret.

NOTA

On remarquera que, dans la présente publication (sauf indicatio contraire) les colonnes laissées en blanc dans le cas des employés et d ouvriers indiqués séparément, signifient que les données relatives au ouvriers pour lesquels les heures sont enregistrées ne sont pa disponibles.

COMMENTARY

First Estimates(1) – June 1976
(Seasonally-adjusted)

The first estimates of the Canadian industrial composite(2) ex of employment (1961 = 100) showed a 0.3% decline from May June. Employment decreased in all industry divisions except in stry, in construction, in finance, insurance and real estate and in ice. All regions reported declines except Quebec which remained le.

Average weekly earnings rose 1.4% at the national industrial posite level in June. All industry divisions and all regions contrib- to the overall increase.

Preliminary Data(1) – May 1976

loyment

Seasonally-adjusted, preliminary data for May 1976 showed a % decrease in the Canada indsutrial composite index of employ- t. All industry divisions participated in the decline with the ption of transportation, communication and other utilities. The est contributor was the durable goods component of manufactur- The decline in trade reflected losses in department stores; while building sector was the major factor for the decrease in truction.

Seasonally-adjusted, average weekly earnings rose 0.2% at the onal industrial composite level. Gains were recorded in all stry divisions except for forestry which showed no variation and nce which declined. Quebec and British Columbia did not contrib- o the rise.

Unadjusted for seasonal variations, average weekly earnings 0.5% to $225.51 at the Canadian industrial composite level. rage hourly earnings advanced five cents in construction, eight s in manufacturing and remained constant in mining. Average kly hours increased in mining and declined in manufacturing and truction.

See note on "Statistical Presentation" under "Concepts and Methods" at the back of this publication.
Industrial Composite is the sum of all industries with the exception of agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. All statistics are based on returns received from employers having twenty (20) or more employees in any month of the year.

OBSERVATIONS

Premières estimations(1) – Juin 1976
(chiffres désaisonnalisés)

L'indice composite(2) de l'emploi dans les activités économiques du Canada (1961 = 100) révèle une baisse de 0.3% de mai à juin. On a constaté une diminution dans toutes les divisions de l'activité économique à l'exception du forestage, de la construction, des finances, assurances et immeuble et des services. Toutes les régions ont enregistré des baisses sauf le Québec où l'emploi est demeuré stable.

Les gains hebdomadaires moyens pour l'ensemble des activités économiques du Canada ont progressé de 1.4% en juin. Toutes les divisions de l'activité économique et toutes les régions ont contribué à la hausse générale.

Données provisoires(1) – Mai 1976

Emploi

Après désaisonnalisation, les données provisoires pour juin 1976 indiquent une diminution de 0.5% de l'indice composite de l'emploi dans les activités économiques du Canada. Toutes les divisions de l'activité économique ont participé à la baisse générale à l'exception des transports, communications et autres services publics. Les biens durables (industries manufacturières) ont constitué le principal élément de cette diminution. Le commerce a connu une baisse ce qui traduit des pertes dans les magasins à rayons; par ailleurs, le principal facteur de la diminution observée dans la construction fut le secteur du bâtiment.

Après désaisonnalisation, les gains hebdomadaires moyens ont augmenté de 0.2% dans l'ensemble des activités économiques du Canada. Toutes les divisions de l'activité économique ont connu des hausses à l'exception du forestage, qui n'a pas varié, et des finances, qui ont affiché une diminution. Le Québec et la Colombie-Britannique n'ont pas contribué à la progression générale.

Sans désaisonnalisation, les gains hebdomadaires moyens se sont accrus de 0.5% pour s'établir à $225.51 dans l'ensemble des activités économiques du Canada. Les gains horaires moyens ont augmenté de cinq cents dans la construction, de huit cents dans les manufactures et sont demeurés stables dans les mines. Le nombre moyen d'heures hebdomadaires travaillées s'est accru dans les mines mais a diminué dans les manufactures et dans la construction.

---

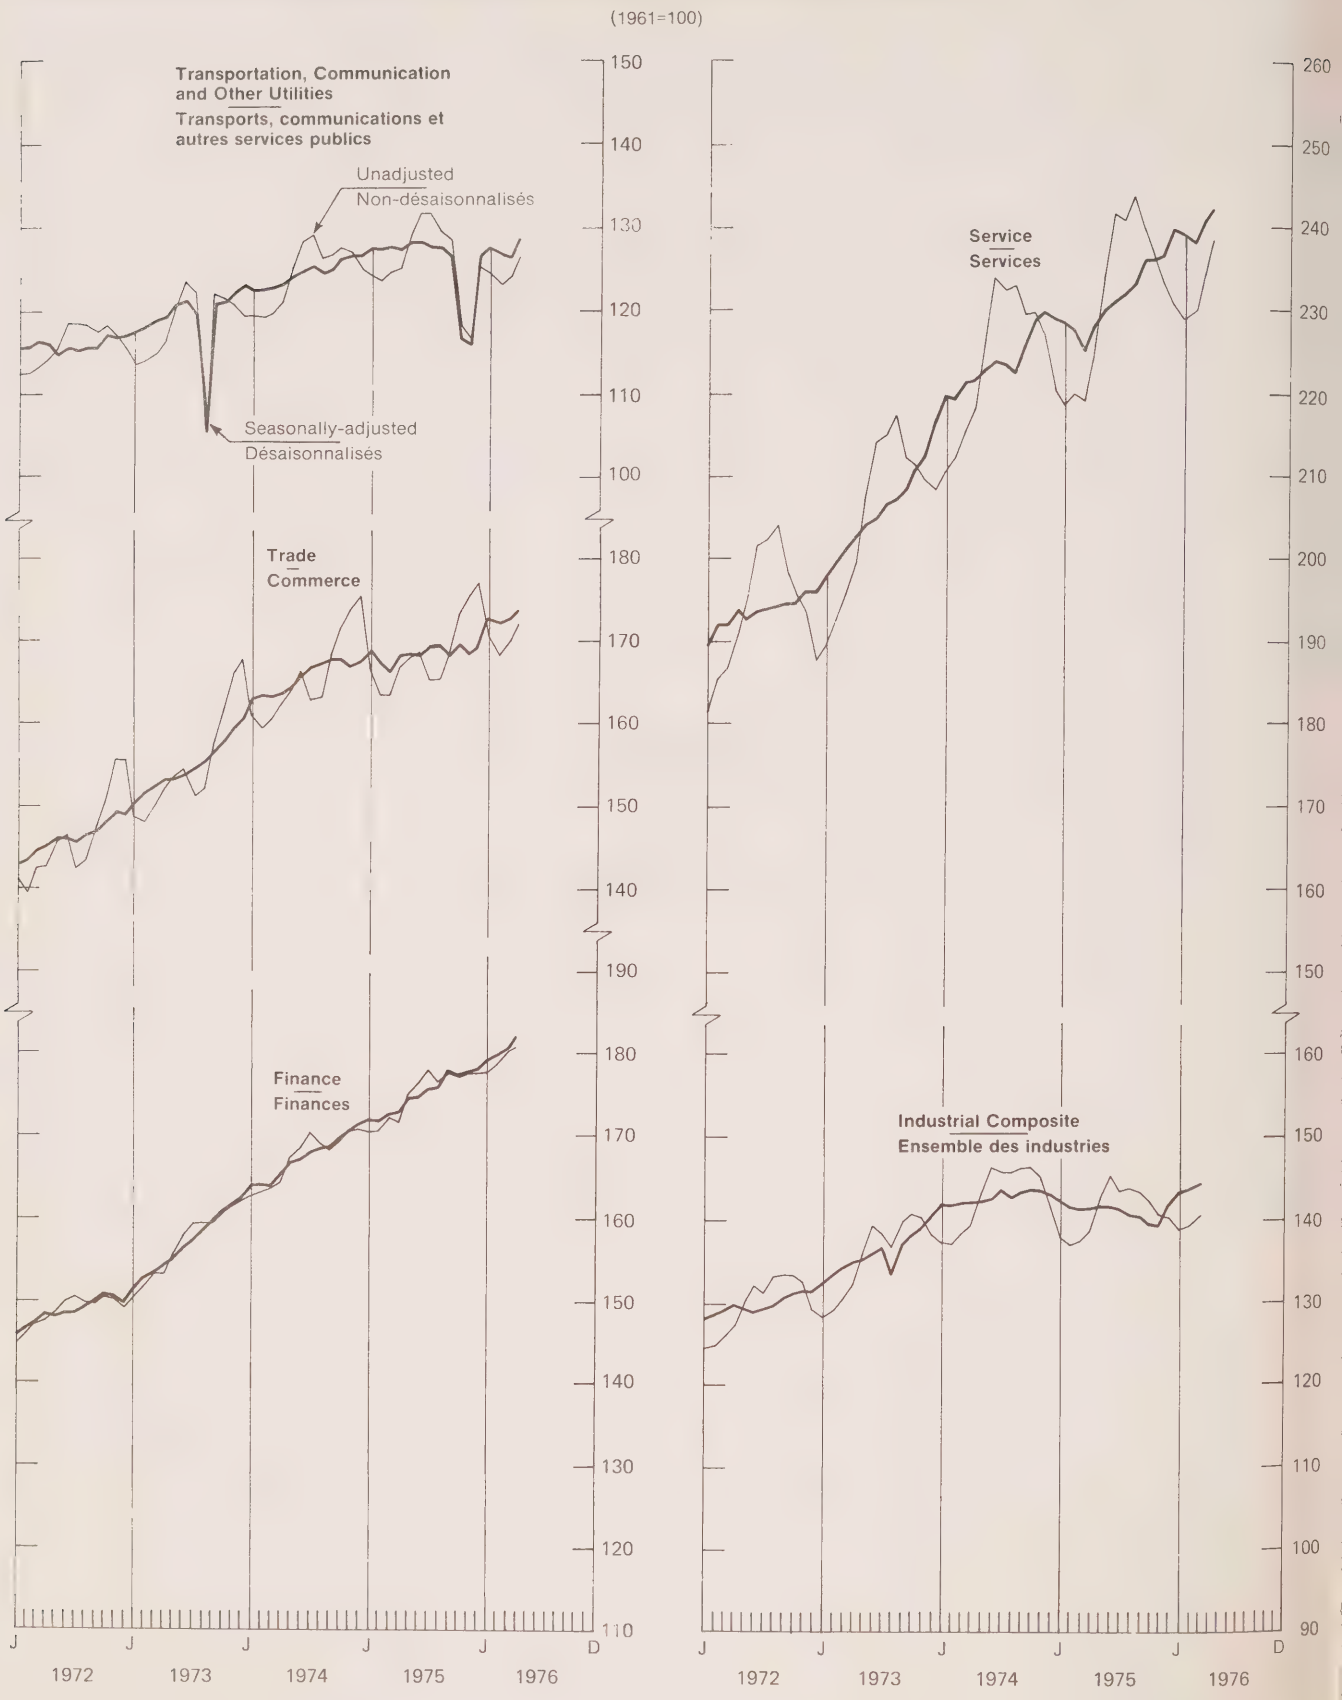

(1) Voir la partie intitulée "Présentation statistique" sous la rubrique "Concepts et méthodes", à la fin de la présente publication.
(2) L'indice composite comprend toutes les branches d'activité sauf l'agriculture, la pêche et le piégeage, l'enseignement et services-connexes, les services d'hygiène et de bien-être, les organisations religieuses, les ménages privés, et l'administration publique et la défense. Toutes les statistiques sont fondées sur les déclarations envoyées par les employeurs comptant au moins vingt(20) salariés au cours d'un mois quelconque de l'année.

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which wages are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. The data in this table relate to average weekly wages of hourly-rated wage-earners only. Although this statistic is no longer tabulated as part of this survey, a special manual calculation has been made in order to retain this table because of its extensive usage. An approximation of this calculation can be obtained by multiplying average weekly hours by average hourly earnings, for a particular industry-area cell. - Nota: 1. Les salaires hebdomadaires courants ont trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des salaires hebdomadaires courants pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les salaires sont dépensés. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des methodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au catalogue. 3. Les données de ce tableau ont trait aux salaires hebdomadaires moyens des ouvriers (heures déclarées) seulement. Bien que cette statistique ne figure plus dans les tableaux tirés de la présente enquête, on a quand même fait un calcul spécial à la main en vue de maintenir ce tableau dont l'usage est tres repandu. On peut obtenir une approximation de ce calcul en multipliant les heures hebdomadaires moyennes par la rémunération horaire moyenne pour un secteur particulier d'industrie-région.

TABLE 7. Average Weekly Earnings in Manufacturing in Current Dollars and Adjusted for Changes in the Consumer Price Index, for Canada

TABLEAU 7. Rémunération hebdomadaire moyenne dans manufactures en dollars courants et corrigée des variations de l'indice des prix à la consommation, Canada

Year and month – Année et mois	Weekly earnings in current dollars – Rémunération hebdomadaire en dollars courants	Index numbers of weekly earnings in current dollars(1961=100) – Indices de la rémunération hebdomadaire en dollars courants	Weekly earnings in 1961 dollars – Rémunération hebdomadaire en dollars de 1961	Index numbers of weekly earnings in 1961 dollars – Indices de la rémunération hebdomadaire en dollars de 1961

(1) First estimate based on a limited number of returns. - Premières estimations fondées sur un nombre limité de déclarations.

Note: 1. The current weekly earnings relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly earnings for any month is therefore adjusted in the above table by the Consumer Price Index for the following month as more representative of the period in which earnings are spent. 2. For Consumer Price Index statistics, construction methods and component details, see monthly report "Prices and Price Index" Catalogue 62-002. 3. This table relates to average weekly earnings of all employees. - Nota: 1. Les rémunérations hebdomadaires courantes on trait aux dernières périodes de paie du mois, tandis que l'indice du prix à la consommation se rapporte au début du mois. La moyenne des rémunérations hebdomadaires courantes pour un mois quelconque est donc rectifiée, dans le tableau ci-dessus, par l'indice des prix à la consommation du mois suivant, cet indice étant plus près de la période au cours de laquelle les rémunérations sont dépensées. 2. Voir le détail de la statistique de l'indice des prix à la consommation, des méthodes de construction de l'indice et de ses éléments dans la publication mensuelle "Prix et indices des prix" no 62-002 au Catalogue. 3. Ce tableau a trait à la rémunération hebdomadaire moyenne de tous les salariés.

HISTORICAL DATA ON EMPLOYMENT, EARNINGS AND HOURS(1)
(based on the 1960 Standard Industrial Classification)

Continuous series from 1957 to date are available as follows:

1. Employment indexes (1961 = 100).
2. Average weekly earnings (formerly titled average weekly wages and salaries).
3. Average weekly hours and average hourly earnings of hourly-rated wage-earners.
4. Average weekly wages of hourly-rated wage-earners (available only for the period 1957-1970).
5. Number of employees and number of hourly-rated wage-earners (available on request basis only for periods prior to 1971).

.. 1957-1960

Monthly data were not published but are available on equest.

Annual averages are shown in:

Review of Employment and Average Weekly Wages and Salaries, *Catalogue 72-201, 1957-67;* Review of Man Hours and Hourly Earnings, *Catalogue 72-202, 1957-67.*

. 1961-1970

Employment Indexes, 1961-1964, for Canada and Ontario, for ghways, bridges and streets; engineering; construction; highway id bridge maintenance; transportation; and transportation, commucation and other utilities. Employment, Earnings and Hours, *Catague 72-002, October 1971.*

Employment Indexes, 1965-1967, for Canada and Ontario, for ghways, bridges and streets; engineering; construction; highway id bridge maintenance; transportation; and transportation, commucation and other utilities. *Catalogue 72-002, February 1968.*

Average Weekly Earnings, 1961-1969 for:

anada: Transportation; Highway and bridge maintenance.

tlantic Region: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance.

ova Scotia: Transportation, communication and other utilities; Transportation.

uebec: Transportation, communication and other utilities; Transportation; Highway and bridge maintenance. *Catalogue 72-002, November 1971.*

Average Weekly Earnings, 1968-1970, for Canada, Ontario d Toronto, for scientific and professional equipment; miscellaneous anufacturing industries; non-durable goods; manufacturing; wholese trade; trade; industrial composite. *Catalogue 72-002, February 72.*

Average Weekly Hours, Average Hourly Earnings, Average eekly Wages of Hourly-rated Wage-earners 1961-1967 for:

nada: Highways, bridges and streets; Engineering; Construction.

DONNÉES CHRONOLOGIQUES SUR L'EMPLOI, LES GAINS ET LA DURÉE DU TRAVAIL(1)
(fondées sur la Classification type des industries de 1960)

Les séries continues suivantes de 1957 jusqu'à aujourd'hui sont disponibles:

1. Indices de l'emploi (1961 = 100).
2. Gains hebdomadaires moyens.
3. Heures hebdomadaires moyennes et rémunération horaire moyenne des ouvriers (heures déclarées).
4. Rémunération hebdomadaire moyenne des ouvriers (heures déclarées) (disponibles pour la période 1957-1970 seulement).
5. Effectifs et nombre d'ouvriers (heures déclarées) (disponibles sur demande seulement pour les périodes antérieures à 1971).

A. 1957-1960

Les données mensuelles n'ont pas été publiées mais sont disponibles sur demande.

Les moyennes annuelles figurent dans:

Review of Employment and Average Weekly Wages and Salaries, *n° 72-201 au catalogue, 1957-1967* Review of Man Hours and Hourly Earnings, *n° 72-202 au catalogue, 1957-1967.*

B. 1961-1970

Indices de l'emploi, 1961-1964, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir Employment, Earnings and Hours, n° *72-002 au catalogue, octobre 1971.*

Indices de l'emploi, 1965-1967, Canada et Ontario, pour les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts; les transports; et les transports, les communications et les autres services publics. Voir le n° *72-002 au catalogue, février 1968.*

Gains hebdomadaires moyens, 1961-1969, pour:

Canada: Transports; entretien des routes et des ponts.

Région de l'Atlantique: Transports, communications et autres services publics; transports; entretien des routes et des ponts.

Nouvelle-Ecosse: Transports, communications et autres services publics; transports.

Québec: Transports, communications et autres services publics; transports; entretien des routes et des ponts. *n° 72-002 au catalogue, novembre 1971.*

Gains hebdomadaires moyens, 1968-1970, Canada, Ontario et Toronto pour les instruments scientifiques et professionnels; les manufactures diverses; les biens non durables; les manufactures; le commerce de gros; le commerce; et l'ensemble des industries. Voir le n° *72-002 au catalogue, février 1972.*

Heures hebdomadaires moyennes, Rémunération horaire moyenne, Gains hebdomadaires moyens des ouvriers (heures déclarées), 1961-1967 for:

Canada: Les routes, les ponts et les rues; le génie; la construction.

Ontario: Highways, bridges and streets; Engineering; Construction; Highway and bridge maintenance. *Catalogue 72-002, June 1972.*

Average Weekly Hours, Average Hourly Earnings, Average Weekly Wages - 1961-1969 Canada Atlantic Region - Quebec - for highway and bridge maintenance - *Catalogue 72-002, December 1971.*

All other available monthly and annual data for 1961-1964 are published in:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, Catalogue 72-504.

All other available monthly and annual data published for 1965 are in *Catalogue 72-201 and 72-202, 1957-1967.*

All other available monthly and annual data for 1966 are published in *Catalogue 72-201 and 72-202, 1966-1968.*

All other available monthly and annual data for 1967 are published in *Catalogue 72-201 and 72-202, 1967-1969.*

All other available monthly and annual data for 1968-1970 are published in *Catalogue 72-201 and 72-202, 1968-1970.*

C. 1971-1973

Employment indexes and average weekly earnings for 1973 for Canada, Atlantic Region, Nova Scotia and Halifax for department stores, retail trade, trade and industrial composite, *Catalogue 72-002 July 1974.*

Employment indexes, unadjusted and seasonally-adjusted, percent female, total employees, average weekly earnings from January 1973 to June 1974, for Canada and Quebec, for highway and bridge maintenance, transportation, transportation, communication and other utilities and industrial composite. *Catalogue 72-002 September 1974.*

Employment for salaried employees, wage-earners (all), wage-earners (hours reported), average weekly earnings for salaried employees and wage-earners (all), average weekly hours and average hourly earnings for wage-earners (hours reported from January 1973 to June 1974 for highway and bridge maintenance. *Catalogue 72-002 September 1974.*

All other series are published in the monthly issues of *Catalogue 72-002 for 1971, 1972* and *1973.*

(1) The issues of the publications referred to in this list contain the latest available data for any given series. Data for these series shown in other issues of these publications may have since been revised.

Ontario: Les routes, les ponts et les rues; le génie; la construction; l'entretien des routes et des ponts. Voir le n^{O} *72-002 au catalogue, juin 1972.*

Heures hebdomadaires moyennes, rémunération horaire moyenne, gains hebdomadaires moyens - 1961-1969 Canada - Région de l'Atlantique - Québec - pour l'entretien des routes et des ponts - n^{O} *72-002 au catalogue, décembre 1971.*

Toutes les autres données mensuelles et annuelles disponibles pour 1961-1964 sont publiées dans:

Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics, January 1961 - May 1965, n^{O} 72-504 au catalogue.

Toutes les autres données mensuelles et annuelles disponibles publiées pour 1965 figurent dans les n^{OS} *72-201* et *72-202* au catalogue, *1957-1967.*

Toutes les autres données mensuelles et annuelles disponibles sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1966-1968.*

Toutes les autres données mensuelles et annuelles disponibles pour 1967 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1967-1969.*

Toutes les autres données mensuelles et annuelles disponibles pour la période 1968-1970 sont publiées dans les n^{OS} *72-201* et *72-202* au catalogue, *1968-1970.*

C. 1971-1973

Indices de l'emploi et gains hebdomadaires moyens, 1973, Canada, Région de l'Atlantique, Nouvelle-Ecosse et Halifax pour les magasins à rayons, le commerce de détail, le commerce et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, juillet 1974.*

Indices de l'emploi, non désaisonnalisés et désaisonnalisés, pourcentage de femmes, le nombre de salariés, rémunération hebdomadaire moyenne de janvier 1973 à juin 1974, pour Canada et Québec, pour l'entretien des routes et ponts, transports, transports, communication et autres services publics et l'ensemble des industries. Voir le n^{O} *72-002 au catalogue, septembre 1974.*

Nombre d'employés, ensemble des ouvriers, ouvriers (heures déclarées), rémunération hebdomadaire moyenne des employés, ensemble des ouvriers, heures hebdomadaires– moyennes et rémunération horaire moyenne des ouvriers (heures– *déclarées)* de janvier 1973 à juin 1974 pour Canada et Québec, pour l'entretien des routes et ponts. Voir le n^{O} *72-002 au catalogue, septembre 1974.*

Toutes les autres séries sont publiées dans les bulletins mensuels du n^{O} *72-002* au catalogue pour les années *1971, 1972* et *1973.*

(1) Les numéros des publications susmentionnées renferment les dernières données disponibles pour toute série donnée. Les données relatives à ces séries figurant dans d'autres numéros de ces publications peuvent avoir été rectifiées depuis.

CONCEPTS AND METHODS

Each month the Monthly Employment, Payrolls and Labour ıcome Section of the Labour Division, through a mail survey, collects ıformation on employment, earnings and hours which are tabulated) present the data in this report. Data which, prior to March 1971, ere published separately in "Employment and Average Weekly /ages and Salaries" (Catalogue 72-002) and in "Man-Hours and ourly Earnings" (Catalogue 72-003) have been combined in this port. The following notes explain the concepts and methods used in ıe survey.

eporting Unit

The reporting unit is usually the establishment, that is, the ıallest industrial unit which is a separate operating entity capable of porting all elements of basic industrial statistics including informa-)n on inputs and outputs needed to calculate "value added" or gross mark-up' or "gross profit" as well as data on employment and yrolls. For purposes of detailed geographic statistics, the Section ten requests that the reporting unit be a sub-establishment unit nich, although not capable of reporting all basic statistics, can report nployment and payroll data for that particular location.

Generally, the survey covers larger companies only, that is, mpanies having 20 or more employees in any month of the year. owever, all the establishments of a multi-establishment company are cluded if the company had 20 or more employees in total in any nth of the year even though any single establishment may have had ly a few employees.

ference Period

Conceptually, the figures refer to the last seven days in the ecified months. In practice, few establishments keep payroll records vering precisely this period and establishments are therefore mitted to report for their last pay period or pay periods in each nth.

When the reported pay period is longer than one week, the yroll data are reduced to one week's proportion of the totals. The nerators of the fractions used in calculating these weekly equiv-nts are 5, 6 or 7, depending on the number of working days per ek in which the establishment operated in the pay period. The nominators of the fractions are the number of working days in the ferent pay periods. For employees paid at annual or monthly rates, ose earnings are not affected by the number of working days in the nth, fixed proportions are used to reduce the earnings to a weekly is, without regard to the length of the calendar month.

When a holiday, layoff or industrial dispute occurs in an ablishment that reports a pay period that is different from the last en days of the month, an adjustment is made to the data, if the iday, layoff or dispute affects the two periods differently, so that the a accurately reflects the actual situation during the reference iod.

verage

All industries are covered by the survey, with the exceptions of iculture, fishing and trapping, education and related services, lth and welfare services, religious organizations, private house-ds and public administration and defence. Because of the limitation he survey to larger firms, there is somewhat uneven coverage of l employment by industry as well as by province and urban area. percentage of total employment covered depends on the propor-

CONCEPTS ET MÉTHODES

Chaque mois, la Section des Statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail de la Division du travail recueille, par voie d'enquête postale, des données sur l'emploi, les gains et les heures de travail, données qui sont ensuite publiées ici sous forme de tableaux. Les données qui, avant mars 1971, étaient publiées séparément dans "Employ*ment and Average Weekly Wages and Salaries*" (n^{O} 72-002 au catalogue) et dans "Man-Hours *and Hourly Earnings*" (n^{O} 72-003 au catalogue) sont regroupées ici. Les notes qui suivent expliquent les concepts et la méthodologie de l'enquête.

Unité de déclaration

L'unité de déclaration est ordinairement l'établissement, c'est-à-dire la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer tous les éléments de base relevant de la statistique des activités économiques, y compris les données sur les entrées et les sorties qui sont nécessaires pour calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut" ainsi que des données sur l'emploi et les rémunérations. Pour obtenir des statistiques géographiques détaillées, la Section demande souvent que l'unité de déclaration se situe à un niveau qui est en deça de celui de l'établissement, mais qui permet quand même d'obtenir des données sur l'emploi et les rémunérations à ce niveau, même si, par définition, ce niveau ne peut fournir toutes les statistiques de base.

En règle générale, l'enquête vise seulement les grandes entreprises, c'est-à-dire les entreprises employant 20 salariés ou plus au cours de n'importe quel mois de l'année. Toutefois, tous les établissements d'une entreprise à établissements multiples sont pris en compte si l'entreprise emploie 20 salariés ou plus, au total, au cours de n'importe quel mois de l'année, même si un de ces établissements peut n'avoir eu que quelques salariés.

Période de référence

En théorie, l'enquête vise les chiffres des sept derniers jours des mois de référence. Vu qu'en pratique peu d'établissements tiennent des registres de paye pour cette période précise, on permet aux établissements de faire porter leurs chiffres sur la (ou les) dernière(s) période(s) de paye de chaque mois.

Si la période de paye visée dépasse une semaine, les chiffres sont réduits en conséquence. Les numérateurs des fractions utilisées pour calculer l'équivalent hebdomadaire sont 5, 6 ou 7, suivant le nombre de jours ouvrables par semaine où l'établissement a été en exploitation pendant la période de paye. Les dénominateurs des fractions sont le nombre de jours ouvrables des diverses périodes de paye. Dans le cas du personnel qui est rémunéré sur une base annuelle ou mensuelle et dont les gains ne sont pas touchés par le nombre de jours ouvrables au cours du mois, on utilise des proportions fixes pour ramener les gains sur une base hebdomadaire, sans tenir compte de la longueur du mois civil.

En cas de jour férié, de congédiement ou de conflit du travail dans un établissement dont la période de paye ne correspond pas aux sept derniers jours du mois, les données sont rectifiées lorsque l'effet du jour férié, du congédiement ou du conflit n'est pas le même sur les deux périodes, de manière que les données soient le reflet fidèle de la situation pendant la période de référence.

Champ de l'enquête

Toutes les branches d'activité économique sont prises en compte dans l'enquête, à l'exception de l'agriculture, de la pêche et du piégeage, de l'éducation et des services connexes, des services d'hygiène et de bien-être, des organismes religieux, des ménages et de l'administration publique et de la défense. Parce que l'enquête se limite aux grandes entreprises, le champ d'observation de l'emploi par branche d'activité, par province et par région urbaine manque quelque peu d'uniformité. Le

tion of larger to smaller establishments. This proportion varies considerably among industries. The following table shows annual employment as reported in the survey as a percentage of the estimated total employment, the latter being estimated by adding together data from the employment and payrolls survey and data from a sample survey of smaller firms plus supplementary surveys. Estimates of total employment are published in "Estimates of Employees by Province and Industry" (Catalogue 72-008).

pourcentage de l'emploi total qui est observé dépend du rapport des grands établissements aux petits établissements. Cette proportion varie considérablement d'une branche à l'autre. Le tableau suivant indique le chiffre annuel de l'emploi, tel qu'il ressort de l'enquête, en pourcentage du chiffre estimatif de l'emploi total, ce dernier étant la somme des résultats de l'enquête sur l'emploi et la rémunération et des résultats d'une enquête par échantillon auprès des petites entreprises ainsi que d'autres enquêtes supplémentaires. Des estimations du nombre total d'employés sont publiées sous le titre "Estimations du nombre d'employés par province et par industrie" (n° 72-008 au catalogue).

Larger-Firm Survey Employment as a Percentage of Total Estimated Employment, by Industry Division, for Canada and Provinces, 1972 Annual Averages(1)

(1) Total estimated employment is derived by adding together data from the employment and payrolls survey of larger-firms and data from a sample survey of smaller firms plus supplementary surveys. - L'estimation de l'emploi total est obtenue en additionnant les données de l'enquête sur l'emploi et la paie dans les grandes entreprises à celles d'une enquête par échantillonnage dans les petites entreprises et d'autres enquêtes supplémentaires.

(2) Includes recreational, business, personal and miscellaneous services only; data has not been published previously. - Comprend seulement les services récréatifs, commerciaux, personnels et divers; ces données n'ont pas été publiées auparavant.

(3) These percentages are small because non-commercial services including education and related services, health and welfare services, religious organizations and private households, are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont petits parce que les services non commerciaux, y compris l'enseignement et les services connexes, la santé et les oeuvres sociales, les organismes religieux et les ménages privés, sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(4) Excludes non-commercial services and public administration and defence; data has not been published previously. - Ne comprend pas les services non commerciaux et l'administration publique et de la défense; ces données n'ont pas été publiées auparavant.

(5) These percentages are smaller because both non-commercial services and public administration and defence are included in total estimated employment but are not part of the larger-firm employment survey. - Ces pourcentages sont plus petits parce que les services non commerciaux de même que l'administration publique et la défense nationale sont inclus dans l'estimation de l'emploi total mais ne sont pas couverts par l'enquête sur l'emploi dans les grandes entreprises.

(6) Data for forestry and construction by province are not available for periods more recent than 1970. Les données pour le forestage et la construction ne sont pas disponibles par province après l'année 1970.

Geographic Classification

Reporting units are assigned to a province, a county (as defined by the Census of Population) and, where applicable, to an urban area. Data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are aggregated in some tables to give statistics for the Atlantic Region. Similarly, data for Manitoba, Saskatchewan and Alberta are added together to provide totals for the Prairie Region. The Census of Population's "Metropolitan Area" definitions were used for the nineteen applicable urban areas. The definitions used for other urban areas are based on a labour market concept; the areas usually include the surrounding territory as well as the urban centre. A list showing the territory included in each tabulated urban area is available from the Monthly Employment,

Classification géographique

Les unités de déclaration sont affectées à une province, à un comté (selon la définition établie par le recensement de la population) et, s'il y a lieu, à une région urbaine. Les données de Terre-Neuve, de l'Île-du-Prince-Edouard, de la Nouvelle-Ecosse et du Nouveau-Brunswick sont agrégées dans certains tableaux présentant des statistiques pour la région de l'Atlantique. De la même manière, les données du Manitoba, de la Saskatchewan et de l'Alberta sont additionnées pour former le total de la région des Prairies. On a retenu la définition de "région métropolitaine" établie pour le recensement de la population dans le cas des dix-neuf régions urbaines. Les définitions employées pour les autres régions urbaines sont fondées sur le concept du marché du travail; les régions englobent ordinairement le territoire avoisinant avec le centre urbain. On peut obtenir

ayrolls and Labour Income Section. The reporting units not located
1 a tabulated urban area are included in county, provincial and
egional totals.

ıdustrial Classification

All establishments are assigned to an industrial class on the
asis of their principal activity. If an establishment is engaged in a
umber of different industrial activities, its principal activity is
etermined by the largest net value added by these activities, or where
is is not possible, by the gross revenue obtained from the different
tivities. When an establishment has very mixed activities, it is not
ecessarily shifted from industry to industry each time its principal
tivity changes.

Statistics from the survey are based on the 1960 Standard
dustrial Classification. A description of the various industries and
oups of industries may be found in the "Standard Industrial
assification Manual', Catalogue 12-501 (1960). The "S.I.C. code"
lumns in the main tables refer to this manual. The tables contain a
w groupings not found in the Standard Industrial Classification.
ese include:

Industrial composite (031-899) - The sum of the industries included in the survey. (see Coverage)

Durable goods manufacturing (durable) - The sum of wood products (S.I.C. 250-259), furniture and fixtures (S.I.C. 260-269), primary metal industries (S.I.C. 290-298), metal fabricating industries (S.I.C. 300-309), machinery (except electrical) (S.I.C. 310-318), transportation equipment (S.I.C. 320-329), electrical products (S.I.C. 330-339), and non-metallic mineral products (S.I.C. 340-359).

Non-durable goods manufacturing (non-dur) - The sum of food and beverages (S.I.C. 100-147), tobacco processing and products (S.I.C. 150-153), rubber products (S.I.C. 160-169), leather products (S.I.C. 170-179), textile products (S.I.C. 180-229), knitting mills (S.I.C. 230-239), clothing (S.I.C. 240-249), paper and allied industries (S.I.C. 270-274), printing, publishing and allied industries (S.I.C. 280-289), petroleum and coal products (S.I.C. 360-369), chemicals and chemical products (S.I.C. 370-379), and miscellaneous manufacturing industries (S.I.C. 380-399).

Building (404,421) - The sum of general contractors (S.I.C. 404) and special trade contractors (S.I.C. 421).

Engineering (406-409) - The sum of highway, bridge and street construction (S.I.C. 406) and other construction (S.I.C. 409).

In addition, the synthetic textile industry (201) is subdivided into spun yarn and fabrics (2011) and filament yarn and staple fibres (2012).

ıployment

Employment data represent all employees on the payrolls of
rting units in the reference period. The employee concept excludes
king owners or partners in unincorporated businesses, non-
king directors, the self-employed, unpaid family workers, persons
g non-remunerative volunteer work, pensioners, home workers,

sur demande une liste indiquant le territoire compris dans chaque région urbaine en s'adressant à la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail. Les unités de déclaration situées ailleurs que dans une région urbaine retenue sont comprises dans les chiffres du comté, de la province et de la région.

Classification par activité économique

Tous les établissements appartiennent à une branche d'activité économique, qui est déterminée en fonction de leur activité principale. Si un établissement a plusieurs activités économiques, son activité principale est déterminée par la plus grande valeur nette ajoutée de ces activités, ou si cela n'est pas possible, par les recettes brutes au titre des différentes activités. Si un établissement exerce des activités très diverses, on ne le transfert pas nécessairement d'une branche à l'autre chaque fois que son activité principale change.

Les statistiques tirées de l'enquête sont fondées sur la Classification type des industries de 1960. On peut trouver une description des diverses activités économiques et groupes d'activités économiques dans le "Manuel de la classification type des industries", n^{O} 12-501 au catalogue (1960). Les colonnes "code de la C.T.I." des principaux tableaux renvoient à ce manuel. Les tableaux renferment quelques groupements qui ne se trouvent pas dans la Classification type des industries. Ce sont:

Ensemble des industries (031-899) - l'ensemble des activités économiques visées par l'enquête. (voir Champ de l'enquête)

Manufactures, biens durables (durable) - l'ensemble de l'industrie des produits du bois (C.T.I. 250-259), de l'industrie des meubles et accessoires d'ameublement (C.T.I. 260-269), de l'industrie des métaux (formes primaires) (C.T.I. 290-298), de l'industrie des produits métalliques (C.T.I. 300-309), de l'industrie de la machinerie (sauf le matériel électrique) (C.T.I. 310-318), de l'industrie du matériel de transport (C.T.I. 320-329), de l'industrie des appareils et du matériel électriques (C.T.I. 330-339), et de l'industrie des produits minéraux non métalliques (C.T.I. 340-359).

Manufactures, biens non durables (non dur.) - L'ensemble de l'industrie des aliments et boissons (C.T.I. 100-147), de l'industrie du traitement et des produits du tabac (C.T.I. 150-153), de l'industrie des produits du caoutchouc (C.T.I. 160-169), de l'industrie des produits du cuir (C.T.I. 170-179), de l'industrie des produits du textile (C.T.I. 180-229), de l'industrie de la bonneterie (C.T.I. 230-239), de l'industrie du vêtement (C.T.I. 240-249), de l'industrie du papier et des produits connexes (C.T.I. 270-274) de l'imprimerie, de l'édition et des industries connexes (C.T.I. 280-289), de l'industrie du pétrole, du charbon et de leurs dérivés (C.T.I. 360-369), de l'industrie chimique et des produits connexes (C.T.I. 370-379) et des industries manufacturières diverses (C.T.I. 380-399).

Bâtiment (404, 421) - L'ensemble des entrepreneurs généraux (C.T.I. 404)et des entrepreneurs spécialisés (C.T.I. 421).

Genie civil (C.T.I. 406-409) - L'ensemble de la construction de routes, ponts et rues (C.T.I. 406) et des autres constructions (C.T.I. 409).

En outre, l'industrie des textiles synthétiques (201) est subdivisée en filés et tissus (2011) et en filés de filaments et fibres discontinues (2012).

Emploi

Les données sur l'emploi représentent tous les salariés inscrits aux registres de paye des unités de déclaration au cours de la période de référence. Le concept des salariés exclut les propriétaires actifs ou partenaires d'entreprises non constituées en corporation, les membres des conseils d'administration qui ne travaillent pas dans l'entreprise, les travailleurs

and persons providing services to an establishment on the basis of a contract for services. Counted as employed, therefore, are all wage-earners and salaried employees who are paid for their services or are on paid absence during the reference period, except for casual employees working less than seven hours in the pay period. *Regular part-time* employees are treated as employed regardless of the number of hours worked during the pay period.

For example, an employee working for a part of the reference period and unemployed or on strike for the rest, is counted as employed. Employees not receiving pay for the entire reference period because of strike or as a consequence of a strike, or those persons on leave without pay, are not included among the employed.

Wage-earners

Wage-earners are defined by occupation rather than by the method of payment. They are those employees engaged in actual production and related operations, including maintenance, warehouse and delivery staffs, security staff, routemen, driver-salesmen, sales clerks in retail stores, waitresses, and working foremen performing functions similar to those of the employees whom they supervise, etc. Wage-earners may be paid a fixed monthly amount or on the basis of hours worked. The survey covers all wage-earners regardless of the method of payment and average weekly wages are computed for all. However, derivations of average weekly hours and average hourly earnings are based only upon data for wage-earners for whom hours data are available.

Salaried Employees

Salaried employees constitute executive, administrative, supervisory, technical and professional personnel, commission agents, and travelling salesmen directly responsible to the administration, as well as general office, clerical and related workers in the office and plant. In addition, working directors of incorporated businesses are included in this category.

Earnings

Earnings of wage-earners and salaried employees represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. Gross pay includes salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. The payroll concept does not include supplementary labour costs such as employers' contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or directors' fees.

The term "earnings" is used to denote the total of weekly wages of the wage-earners and salaries of the salaried employees. The publications prior to March 1971 contained this combined data entitled "Average Weekly Wages and Salaries'. These data are comparable with "Average Weekly Earnings" of total employees in

autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les pensionnés, les travailleurs à domicile et les personnes fournissant des services à forfait ou sous contrat. Sont donc considérés comme salariés tous les ouvriers et tous les employés qui sont rémunérés pour leurs services ou qui sont en congé payé pendant la période de référence, à l'exception des occasionnels ayant travaillé moins de sept heures pendant la période de paye. Les *salariés réguliers à temps partiel* sont comptés parmi les salariés quel que soit le nombre d'heures qu'ils travaillent pendant la période de paye.

Par exemple, une personne travaillant une partie de la période de référence et en chômage ou en grève le reste de la période, est comptée comme occupée. Les salariés qui ne sont pas rémunérés pour toute la période de référence à cause d'une grève ou des conséquences d'une grève, ou les personnes en congé sans paye ne figurent pas parmi les personnes occupées.

Ouvriers

L'ouvrier est défini par la nature du travail plutôt que par le mode de rémunération. Les ouvriers sont les personnes travaillant effectivement à la production et à des opérations assimilées, en particulier le personnel d'entretien, d'entrepôt et de livraison, le personnel de sécurité, les chauffeurs-livreurs, les vendeurs itinérants, les commis des magasins de détail, les serveuses et les contremaîtres remplissant des fonctions analogues à celles des ouvriers dont ils ont la charge, etc. Les ouvriers peuvent être rémunérés sur une base mensuelle fixe ou suivant le nombre d'heures travaillées. L'enquête couvre tous les ouvriers quel que soit leur mode de rémunération et les gains hebdomadaires moyens sont calculés pour tous. Toutefois, les heures hebdomadaires moyennes et les rémunérations horaires moyennes sont calculées uniquement d'après les données relatives aux ouvriers dont on peut connaître le nombre d'heures de travail.

Employés

Les employés comprennent les directeurs, les administrateurs, les surveillants, les cadres techniques et spécialisés, les agents à la commission, les voyageurs de commerce relevant directement de l'administration, ainsi que les employés de bureau, les commis et les travailleurs assimilés, au bureau et à l'usine. Les membres des conseils d'administration d'entreprises constituées en corporation qui travaillent dans l'entreprise sont également compris dans cette catégorie.

Rémunération

Les rémunérations des ouvriers et des employés représentent les gains bruts de la semaine, avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc. La rémunération brute comprend les salaires, la rémunération au taux ordinaire, la rémunération du travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les cotisations de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents de travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur de la pension, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents ni les jetons de présence des administrateurs.

Le terme "rémunérations" désigne l'ensemble des gains des ouvriers et des employés. Les publications antérieures à mars 1971 renfermaient des données réunies sous le titre "Average Weekly Wages and Salaries". Ces données sont comparables aux "rémunérations hebdomadaires moyennes" des salariés pris en compte ici. Ce système permet

he present publication. The system now provides separate earnings lata for all wage-earners and salaried employees whereas formerly nly "Average Weekly Wages" for hourly-rated wage-earners was ıvailable.

ndex Numbers

Index numbers are calculated by dividing the current month's mployment (or payroll) by the monthly-average of the total base ear employment (or payroll). The current employment consists of all mployment reported by establishments that meet our size criteria in he current period. Base year employment consists of the employment f establishments that had 20 or more employees in any month of 961. The payroll index is calculated in a similar fashion.

Seasonally-adjusted index numbers remove from the employ- ıent indexes those regularly recurring fluctuations known as "sea- nal variations'. The adjusted index numbers thus approximate the end, cycle, and irregular components of the time series. The X-11 ariant of the U.S. Census Method II is used to calculate the asonally-adjusted index numbers; additional seasonally-adjusted ries may be found in "Employment, earnings and hours, season- ally- adjusted series January 1961 - December 1971" (Catalogue 2-206).

verages

The average weekly hours figure is obtained by dividing total eekly man-hours by the number of wage-earners who worked those ours. Average hourly earnings are obtained by dividing total weekly ages of hourly-rated wage-earners by their total weekly hours. Both these averages apply only to the subset of wage-earners for whom ourly details are reported. It should be noted that total hours include vertime hours actually worked and that the wage-earner total cludes part-time wage-earners and casuals working more than seven ours during one week. Annual statistics are calculated from the gregate of the monthly data, with the exception of those shown as eliminary(p); the latter are based on monthly averages.

tatistical Presentation

Each month, statistics for three months are prepared by the onthly Employment, Payrolls and Labour Income Section. Data for first, most current month, are entitled first estimates. They are sed on a limited number of returns (usually about 50%) and only ghly aggregated figures are released in the Statistics Canada Daily d the First Estimates table of this publication. Simultaneously, ond estimates are prepared for the month immediately preceding most current data and third estimates for the month prior to that. th of these latter estimates are of higher quality than that of the first cause of the higher rate of returns (typically, 65% and 75%, pectively). Consequently full details for both months are shown hin this publication.

After completion of the third estimate, further revisions to the a are made to incorporate late returns and corrected information eived from our respondents or to rectify mechanical errors. Larger rrections are calculated immediately and appear in the historical l special tables and in column for the previous year in tables 2, 3 l 4 of this publication. The smaller corrections are completed in the ual tabulations when all returns are retabulated to produce revised res and annual averages; these data are contained in catalogue 201 and 72-202.

maintenant d'avoir des données distinctes pour tous les ouvriers et les employés tandis qu'autrefois on ne pouvait connaître que les "rémunérations hebdomadaires moyennes" des ouvriers rémunérés à taux horaire.

Nombres-indices

On obtient les nombres-indices en divisant le nombre total de salariés (ou la rémunération) du mois courant par la moyenne mensuelle du nombre de salariés (ou de la rémunération) de l'année de base. Le nombre courant de salariés est l'ensemble des salariés déclarés par les établissements dont la taille répond à notre critère pendant la période courante. Le nombre de salariés pour l'année de base est le nombre de salariés des établissements employant 20 salariés ou plus pendant n'importe quel mois de l'année 1961. L'indice de la rémunération est calculé de la même manière.

La désaisonnalisation des nombres-indices a pour effet d'éliminer des indices de l'emploi les fluctuations qui se produisent à intervalles réguliers et qui s'appellent variations saisonnières. Les nombres-indices désaisonnalisés représentent donc assez bien la tendance, le cycle et les composantes irrégulières de la série chronologique. La variante X-11 de la méthode II du recensement des Etats-Unis est utilisée pour calculer les nombres-indices désaisonnalisés; on peut trouver d'autres séries désaisonnalisées dans "Emploi, rémunérations et heures, séries désaisonnalisées janvier 1961-décembre 1971" (n^{o} 72-206 au catalogue).

Moyennes

On calcule les heures hebdomadaires moyennes en divisant le nombre total d'heures-hommes par le nombre d'ouvriers qui ont fait ces heures. On obtient les rémunérations horaires moyennes en divisant la rémunération hebdomadaire totale des ouvriers rémunérés à l'heure par le nombre total de leurs heures par semaine. Ces deux moyennes s'appliquent seulement aux ouvriers dont le nombre d'heures est déclaré. À remarquer que le nombre total d'heures comprend les heures supplémentaires réelles et que le total des ouvriers comprend les ouvriers à temps partiel et les occasionnels qui travaillent plus de sept heures par semaine. À l'exception des statistiques provisoires (p), qui sont fondées sur les moyennes mensuelles, les statistiques annuelles sont établies à partir de l'ensemble des données mensuelles.

Présentation statistique

Chaque mois, la Section des statistiques mensuelles sur l'emploi, la rémunération et le revenu du travail prépare des statistiques pour trois mois. Les données du premier mois, le mois le plus récent, sont appelées "premières estimations". Elles sont fondées sur un nombre limité de déclarations (environ 50%) et seuls des chiffres très généraux sont publiés dans Le Quotidien de Statistique Canada et dans le tableau "Premières estimations" de la présente publication. En même temps, la Section prépare des deuxièmes estimations pour le mois qui précède le mois le plus récent, et des troisièmes estimations pour le mois qui précède celui-là. Ces deux dernières estimations sont de meilleure qualité que les premières en raison de la disponibilité d'un plus grand nombre de réponses (d'habitude 65% pour les deuxièmes estimations et 75% pour les troisièmes). Par conséquent, la présente publication contient tous les détails pour ces deux mois.

Une fois terminées les troisièmes estimations, on effectue d'autres rectifications à la lumière des déclarations des retardataires et des corrections reçues de nos enquêtés, ou par suite de la correction de certaines erreurs mécaniques. Les corrections les plus importantes sont effectuées immédiatement; elles paraissent dans les tableaux chronologiques et spéciaux ainsi que dans la colonne de l'année précédente aux tableaux 2, 3 et 4 de la présente publication. Les corrections de moindre importance sont effectuées dans les tableaux annuels quand toutes les réponses ont été totalisées de nouveau en vue de la production de chiffres et de moyennes annuelles rectifiés; ces données sont publiées dans les publications 72-201 et 72-202.
